Proposed OPD ShotSpotter Phase IV Coverage Area Expansion

ShotSpotter systems are deployed to provide coverage for one or more specified areas, each bounded by a specific coverage area perimeter. ShotSpotter will design the final coverage area based upon the Department's requirements and based upon analysis of historical crime data. The areas delineated by a blue boundary in the image below are rough estimates, outlining the areas of OPD Police Beats 25X, 25Y, 29X, 30Y, and 35X. These areas are recommended by OPD for ShotSpotter expansion based on input from OPD Command and OPD Ceasefire Commander.
