

# Current Conditions + Crash History

Crashes from 2012-2016, only includes fatal, severe and moderate crashes. Data sources: SWITRS, 2012-2016; Alameda County Sheriff's Office Coroner's report, 2015-2016.

<sup>1</sup> High injury corridors (HIC) are streets where severe and fatal crashes concentrate. In Oakland, HICs make up just 6% of city streets, but account for 60% of severe and fatal traffic crashes. For this reason, preventing future life-changing or life-ending crashes and ensuring safety along the corridor is the City's top priority in redesigning this street
