

# AGENDA REPORT

**TO:** Edward D. Reiskin  
City Administrator

**FROM:** Erin Roseman  
Finance Director

**SUBJECT:** FY 2021-22 Landscaping and Lighting  
District (LLAD) – Confirmation

**DATE:** April 22, 2021

City Administrator Approval

Date: May 4, 2021

## **RECOMMENDATION**

**Staff Recommends That The City Council Conduct a Public Hearing and Upon Conclusion Adopt A Resolution Confirming The City Of Oakland Landscaping And Lighting Assessment District (LLAD) For Fiscal Year (FY) 2021-22 Engineer's Report And The Levying Of Assessments.**

## **EXECUTIVE SUMMARY**

Upon completion of the public hearing on May 18, 2021, this resolution would confirm the information in the Engineer's Report and the levy of assessments within the Landscaping and Lighting District (LLAD) for Fiscal Year 2021-22. The City of Oakland collects the LLAD assessments through the County of Alameda property tax bill. Upon fulfillment of the LLAD requirements, the City of Oakland will submit the assessment roll to the Alameda County Auditor-Controller by August 10, 2021 for inclusion in the Fiscal Year 2021-22 property tax roll.

## **BACKGROUND / LEGISLATIVE HISTORY**

The California Landscaping and Lighting Act of 1972 (California Streets and Highways Code Sections 22500-22679) allows local government agencies to form assessment districts for the purpose of financing the costs and expenses of landscaping and lighting in public areas, among other things as noted below in the Analysis Section. The City of Oakland formed the LLAD on June 23, 1989. In July 1993, the City increased the assessment rates after preparation of an engineer's report, notice and hearing, and public opportunity to comment.

The City Council annually approves a series of resolutions 1) initiating the process to levy the annual LLAD assessments by ordering the preparation of the Preliminary Engineer's Report, 2) approving the Preliminary Engineer's Report, declaring the intention to levy the annual assessments, and setting the date of the public hearing to take final action on the levying of the annual assessments; and 3) confirming the assessments after the public hearing. The City Council approved and adopted the LLAD Initiation and Intention Resolutions on March 16, 2021 and April 12, 2021 respectively.

City Council  
May 18, 2021

## **ANALYSIS AND POLICY ALTERNATIVES**

The information below was also shared in the Initiation and Intention report, which was included with resolutions adopted by City Council on March 16, 2021 and on April 12, 2021. It is included here again for reference related to the current proposed confirmation resolution.

### *Landscaping and Lighting Assessment District (LLAD) Coverage and Boundaries*

The LLAD, utilizing a direct benefit assessment, provides a funding source for City parks, grounds and landscaped medians, open space, pools, and custodial services at about 140 park and recreation facilities, 44 stand-alone restrooms, and many other recreation-related buildings and infrastructure in the City of Oakland. The LLAD also supports activities such as community gardens and ball field maintenance and pays utility costs for City streetlights and water use at parks and fields. The LLAD boundaries coincide with the City of Oakland boundaries and encompass all land parcels within the City. The LLAD boundaries remain the same as those described in the FY 2020-21 Engineer's Report approved by the City Council, Resolution No. 88170 C.M.S., on June 16, 2020.

### *Annual LLAD Process and Timeline*

In compliance with the California Streets and Highways Code, Section 22622, staff prepared, and Council approved a resolution initiating the annual assessment process of the LLAD for the Fiscal Year 2021-22 property tax roll in March 2021. The resolution described the importance of initiating the LLAD and authorized the City Administrator or designee to order the District Engineer to prepare and file with the City Clerk, a Preliminary Engineer's Report for this district.

The California Streets and Highways Code Sections 22620-22631 describes the annual process/requirements for levying assessments as follows:

1. Request that a preliminary engineer's report be prepared which includes: a listing of improvements to be operated and maintained, a cost estimate identifying the cost to operate and maintain those improvements, a description of the methodology to spread the costs to the benefitting properties within the LLAD, and a listing of each individual assessment. (This step was completed at the March 16, 2021 City Council Meeting).
2. Approve the engineer's report and adopt a resolution of intention. The resolution of intention declares the City Council's intention to levy and collect assessments within the LLAD for the fiscal year. It also states whether the assessment is proposed to change from the previous year and sets a public hearing date, time, and location. (This step was completed at the April 12, 2021 City Council Meeting).
3. Conduct the public hearing affording all interested parties the opportunity to hear and be heard, and after the public hearing adopt a resolution confirming the final engineer's report information and the assessment levy within the LLAD for the fiscal year (this is the proposed resolution). The public hearing is scheduled to occur at 1:30 p.m. on May 18, 2021.

- The City of Oakland collects the LLAD assessment through the County of Alameda property tax bill. Upon fulfillment of the LLAD requirements, the City of Oakland must submit the detailed assessment data for all affected properties to the Alameda County Auditor-Controller for inclusion in the Fiscal Year 2021-22 property tax roll by August 10, 2021.

*Assessment*

The proposed resolution states that the City Council does not intend to increase assessments for the Fiscal Year 2021-22 LLAD. The current assessment rate structure has been in place since Fiscal Year 1993-94. The following **Table 1**, taken directly from the Engineer’s Report, summarizes the assessment revenue by benefit zone and general land use. Zones, zone maps, and rates calculations are included in the attached Engineer’s Report (**Attachment A**).

**Table 1: Assessments Summary**

Table 5: ASSESSMENT REVENUE BY IMPROVEMENT TYPE AND BENEFIT ZONE						
DESCRIPTION	Zone 1		Zone 2		Zone 3	Total All Zones
	Residential	Non Residential	Residential	Non Residential	Non Residential	
Lighting	\$1,140,992	\$ 654,871	\$ 400,783	\$ 139,006	\$ 185,213	\$2,520,865
Landscaping	\$ 8725,175	\$ 2,367,611	\$ 3,327,601	\$ 545,920	\$ 863,462	\$15,829,770
Total Estimated Assessments	\$9,866,167	\$3,022,482	\$3,728,384	\$684,927	\$1,048,675	\$18,350,635

The Fiscal Year 2021-22 Final Assessment Roll attachment to the Final Engineer’s Report is not included here due to its large file size; however, it is on file with the City Clerk. The Final Assessment Roll attachment is a document that lists all properties within the assessment district by Assessor’s Parcel Number and identifies each property’s assessment amount.

**FISCAL IMPACT**

This report confirms the City’s annual LLAD process in order to levy the assessment this year. The LLAD has steadily improved its historical negative fund balance. However, increasing costs (e.g., utility rates, personnel, etc.) and the inability to adjust the assessment rate has prevented the City from reaching its goal of maintaining a net positive LLAD fund balance. The passage of Measure Q in March of 2020 provides additional resources for LLAD related services.

*District Engineer Contract*

A contractual agreement with Francisco & Associates, Inc. was previously executed, and funding is available to maintain the contract until December 2023. There is no impact on the General Fund and no additional funding is requested.

### **PUBLIC OUTREACH/INTEREST**

Pursuant to the California Streets and Highways Code, the City Council must hold a public hearing to provide an opportunity for any interested party to be heard. The public hearing is set for Tuesday, May 18, 2021 at 1:30 p.m., or as soon thereafter as the item may be heard, in the City Council Chambers or via teleconference.

### **COORDINATION**

This report was prepared in coordination with the Finance Department, the City Administrator's Office, and Francisco & Associates, Inc. (the City's Contractor who annually administers special financing districts).

### **SUSTAINABLE OPPORTUNITIES**

**Economic:** The LLAD generated revenue funds the maintenance of city parks, grounds and landscaped medians, open space, pools, and custodial services at about 38 park and recreation facilities, 44 stand-alone restrooms, and many other recreation-related buildings and infrastructure in the City of Oakland. The LLAD also supports activities such as community gardens and ball field maintenance and pays utility costs for City streetlights and water use at parks and fields.

**Environmental:** Providing and maintaining clean parks, tot lots, and recreational facilities reduces urban blight, littering, vandalism, and graffiti. It also provides natural sources of fresh oxygen, needed shade and air coolant, beautification, and aesthetic enhancement. Landscaped parks and strips also act as environmental cleaners by capturing dust, minimize noise compared to concrete, and absorb water runoff. All the environmental benefits lead to a healthier community.

**Race & Equity:** The LLAD coincides within the boundaries of the City of Oakland and encompasses all residential and non-residential parcels of land which enhances all residents' lives within the City. Well-lit and functioning streetlights provide better lighting to adjacent property owners, motorists and pedestrians traveling at night, and better security and protection to properties. Maintained landscapes, parks, and facilities provides the community with areas to enjoy sporting events, social events, and other physical and social activities. These activities are proven to increase a sense of community, increased property value, and lead to multiple mental and health benefits.

SECTION I  
INTRODUCTION  
ENGINEER'S REPORT  
CITY OF OAKLAND  
LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT  
FISCAL YEAR 2021-22

***Background Information***

The Landscaping and Lighting Assessment District (the "District") was originally formed on June 23, 1989 and subsequently approved by the registered voters of the City of Oakland (the "City") in 1994. This District utilizes direct benefit assessments as a funding source for the operation and maintenance of landscaping, park and recreation facilities, and street lighting within the City of Oakland.

An engineering analysis was performed in 1989 to ensure the costs for funding the operation, maintenance, and servicing of improvements were apportioned to each parcel within the City based upon the special benefits they received from the improvements. Payment of the assessment for each parcel is made in the same manner and at the same time as payments are made for property taxes. All funds collected through the assessment are placed in a special fund and are only used for the purposes stated within this Engineer's Report.

As required by the Landscaping and Lighting Act of 1972, the Engineer's Report includes: (1) a description of the improvements to be operated, maintained, and serviced by the District, (2) a cost estimate for the District, and (3) a listing of the proposed Fiscal Year 2021-22 assessments to be levied upon each assessable lot or parcel within the District.

The City of Oakland will hold a Public Hearing on May 18, 2021, regarding the District which will provide an opportunity for any interested person to be heard. At the conclusion of the Public Hearing, the City Council may adopt a resolution confirming the assessment rates as originally proposed or as modified.

## **SECTION II**

**ENGINEER'S REPORT PREPARED PURSUANT TO THE PROVISIONS OF THE  
LANDSCAPING AND LIGHTING ACT OF 1972  
SECTION 22500 THROUGH 22679  
OF THE CALIFORNIA STREETS AND HIGHWAY CODE**

**CITY OF OAKLAND  
LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT**

**FISCAL YEAR 2021-22**

Pursuant to the Landscaping and Lighting Act of 1972 (Part 2 of Division 15 of the Streets and Highways Code of the State of California), the Act, and in accordance with Resolution of Initiation, adopted on March 16, 2021 by the City Council of the City of Oakland in the State of California, and in connection with the proceedings for:

**CITY OF OAKLAND  
LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT**

Hereinafter referred to as the "Assessment District" or "District", I, Joseph A. Francisco, P.E., the authorized representative of Francisco & Associates, Inc., and the duly appointed Engineer of Work, submit herewith the "Report" consisting of five (5) parts as follows:

### **PART A: PLANS AND SPECIFICATIONS**

This part describes the improvements to be operated, maintained and serviced within the District. For a more detailed description of the improvements, refer to the listing of improvements on file in the Oakland Public Works Department, which are incorporated herein by reference.

### **PART B: ESTIMATE OF COST**

This part contains an estimate of the cost of the proposed improvements that are supported by assessment revenues for Fiscal Year 2021-22, including incidental costs and expenses. For a more detailed cost estimate of the improvements, refer to the cost estimate on file in the Oakland Public Works Department, which are incorporated herein by reference.

### **PART C: ASSESSMENT DISTRICT DIAGRAM**

This part incorporates a Diagram of the Assessment District showing the exterior boundaries of the District, the boundaries of any zones within the District, and the lines and dimensions of each lot or parcel of land within the District, are incorporated herein and on file in the Office of the Oakland City Clerk. The lines and dimensions of each lot or parcel within the Assessment District are those lines and dimensions shown on the maps of the Assessor of the County of Alameda for the fiscal year when this Report was prepared.

**PART D: METHOD OF APPORTIONMENT OF ASSESSMENT**

This part describes the method of apportionment of assessments which was developed when the assessment district was formed in 1989. The method of apportionment is based upon parcel classification of land, and location within the District, in proportion to the estimated benefit to be received.

**PART E: PROPERTY OWNER LIST & FINAL ASSESSMENT ROLL**

This part contains a list of the Assessor Parcel numbers of Alameda County, and the net amount to be assessed upon the benefited lands within the District for Fiscal Year 2021-22. The Final Assessment Roll is filed in the Office of the Oakland City Clerk and is incorporated in this Report by reference. The list is keyed to the records of the Alameda County Assessor, which are incorporated herein by reference.

**PART A**

**PLANS AND SPECIFICATIONS**

The facilities and improvements that have been constructed and those that may be subsequently constructed within the District, which will be maintained and serviced, consist of street lighting; landscaping; public park and recreation facilities; and appurtenant facilities including, but not limited to, personnel, electrical energy, utilities such as water, materials, contractual services, and other items necessary for the facilities.

**Street Lighting:**

The street lighting system includes all street lights within the public right-of-way, easements, and other exterior lighting which is not part of a building system. Street lights and appurtenant facilities include, but are not limited to: poles, fixtures, bulbs, conduits, equipment including guys, anchors, posts, pedestals, and metering devices as required to provide safe lighting within the boundaries of the District. The locations of street lighting improvements are shown on a Street Light Base Map kept on file at the City's Electrical Engineering Section. There are more than 38,000 streetlights on residential, arterial, and collector streets, plus several hundred other public lights along pathways and outside buildings. Undergrounding projects, in accordance with PG&E programs, when warranted, are also included in the District improvements.

As streetlights are installed and upgraded to LED (Light Emitting Diode), the District's operating and maintenance costs are impacted. Cost estimates prepared by the Oakland Department of Transportation consider the projected reduction in energy and maintenance costs, and the increase to the debt service payment for the LED Lighting Conversion Lease for the replacement of the 31,000 high pressure sodium streetlights to LED.

Additionally, each year the annual street light costs exceed the assessment revenue available. To address the deficit in streetlight costs, the City will use one-time salary savings from Fiscal Year 2020-21 and other non-assessment revenues (Measure Q – Parks and Gas Tax Funds) to maintain service levels and fund the shortfall associated with street lighting and utility costs.

**Public Park and Recreational Facilities:**

The public park and recreational facilities, and landscape improvements, which are located within the incorporated limits of the City of Oakland, will be operated, maintained, and serviced by the District. Public park and recreational facilities include, but are not limited to: landscaping; irrigation systems; hardscapes; plazas; trees; sidewalks; trails; fixtures; appurtenant facilities i.e. lights, tot lots, play courts, public restrooms, sports fields, sports courts, parkways, etc.; designated easements; and buildings or structures used for the support of park and recreational programs such as, but not limited to, recreation centers, swimming pools, picnic facilities, water-based recreation facilities, and nature oriented facilities.

All landscaping, park, and recreational improvements in Oakland, maintained by the City on public lands, are included in the District. The District includes approximately 2,500 acres of street, park, and plaza landscaping featuring scenic Joaquin Miller Park, Lake Merritt, Mandela Parkway and Union Point Park; more than 140 City parks and public grounds; 38 Park and Recreation facilities and 44 Field Restrooms. The District also supports activities outside the Oakland Public Works Department such as community gardens, ball field maintenance and many other recreation related buildings and infrastructure.

Tables 1, 2, and 3 on the following pages, present a partial list of the District's landscaping, park and recreational facilities by each Benefit Zone. This list is not exclusive and many small facilities (e.g., landscaped medians and islands) are not included. The benefit zones are those depicted on the Assessment Diagram for Residential and Nonresidential Zones.

Lakeside Park Improvements	12th Street		

Maintenance means the furnishing of services and materials for the ordinary and usual operation, maintenance and servicing of the landscaping, street lighting, public parks, street and park trees and recreational facilities and appurtenant facilities, including: repair, removal or replacement of all or part of any of the landscaping, street lighting, public park and recreational facilities, or appurtenant facilities; providing for the life, growth, health, and beauty of the landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, and treating for disease or injury; and the removal of trimmings, rubbish, debris, and other solid waste. Servicing means the furnishing of water for the irrigation of the landscaping, the maintenance of any street lighting facilities or appurtenant facilities, and the furnishing of electric current or energy, gas, or other illuminating agent for the street lighting, public park, and recreational facilities or appurtenant facilities.

The plans and specifications for the improvements are on file in the Oakland Public Works Department of the City of Oakland.

**PART B**

**ESTIMATE OF COST**

The City's Fiscal Year 2021-22 Proposed Revenues and Cost Estimate Summary for the District is shown below in Table 4.

Table 4 - Estimate of Revenues and Costs City of Oakland Landscaping and Lighting Assessment District Fiscal Year 2021-22	
	FY 2021-22 REVENUES AND COST ESTIMATE FOR LLAD ELIGIBLE ACTIVITIES
<b>Estimated Revenues</b>	
Property Assessments	\$18,350,635
Port Revenue - Non Airport Parcels	\$644,051
Port Revenue - Airport Parcels	\$153,813
Recoveries for Damaged Lights	\$207,275
Tree Removal Permits	\$52,000
Collection from Delinquent Accounts	\$0
Revenues from Other Funds	<u>\$22,870,428</u>
<b>Total Revenues</b>	<b>\$42,278,202</b>
<b>Estimated Expenditures (Cost Estimate)</b>	
<b>Finance</b>	
Revenue Collections	\$32,473
Budget Analysis & Operations	<u>\$25,089</u>
<i>Subtotal</i>	<b>\$57,562</b>
<b>Public Works</b>	
Administration & County Collection Fee	\$311,769
Parks, Grounds and Medians	\$18,227,477
Trees	\$5,834,217
Facilities Management & Development	\$656,053
Insurance Liability	\$3,215,382
Ball Fields	<u>\$625,374</u>
<i>Subtotal</i>	<b>\$28,870,272</b>
<b>Transportation</b>	
Street Light Maintenance	\$8,588,625
Electrical Services: Administration	<u>\$1,299,777</u>
<i>Subtotal</i>	<b>\$9,888,402</b>
<b>Parks &amp; Recreation</b>	
Recreation, Cultural, Civic	\$5,556,237
Aquatics	<u>\$778,681</u>
<i>Subtotal</i>	<b>\$6,334,918</b>
<b>Economic &amp; Workforce Development</b>	
Marketing & Special Development	<u>\$0</u>
<i>Subtotal</i>	<b>\$0</b>
<b>Non-Departmental</b>	
Debt Service	<u>\$1,533,089</u>
<i>Subtotal</i>	<b>\$1,533,089</b>
<b>Total Expenditures</b>	<b>\$46,684,243</b>
Contribution to/(from) Fund Balance	<b>(\$4,406,041)</b>
Estimated Beginning Fund Balance (est. July 1, 2021)	\$565,430
Estimated Ending Fund Balance (est. June 30, 2022)	<b>(\$3,840,611)</b>

\* Negative Fund Balances will not be eliminated by using future District assessments, but instead from other funds.

The 1972 Act provides that the total cost for operations, maintenance and servicing of those facilities or improvements, which provide a “special benefit” to the parcels can be recovered in the assessment spread including incidental expenses. These incidental expenses include but are not limited to engineering fees, legal fees, printing, mailing, postage, publishing, etc.

In addition, LLAD revenues have not increased since the Assessment District was formed in 1989, more than 30 years ago. This has created an ongoing deficit in the District which can no longer be sustained without significant reductions in service levels. In order to address the difference between revenues and expenditures, the City used one-time salary savings from Fiscal Year 2020-21 and other non-assessment revenues (Measure Q – Parks and Gas Tax Funds) to maintain service levels and fund the shortfall in the District. This City contribution will be used to offset costs that are attributable to the general benefits received by the public at large.

The District’s total assessment revenue allocation by improvement type and benefit zone is shown below in Table 5. The location of the zones of benefit and the method of apportionment are described in Part D of this Report.

DESCRIPTION	Zone 1		Zone 2		Zone 3	Total All Zones
	Residential	Non Residential	Residential	Non Residential	Non Residential	
Lighting	\$1,140,992	\$654,871	\$400,783	\$139,006	\$185,213	\$2,520,865
Landscaping	<u>\$8,725,175</u>	<u>\$2,367,611</u>	<u>\$3,327,601</u>	<u>\$545,920</u>	<u>\$863,462</u>	<u>\$15,829,770</u>
Total Estimated Assessments	\$9,866,167	\$3,022,482	\$3,728,384	\$684,927	\$1,048,675	\$18,350,635

The 1972 Act requires that a special fund be set up for the revenues and expenditures of the District. Funds raised by the assessment shall be used only for the purpose as stated herein. A contribution to the District by the City may be made to reduce assessments, as the City Council deems appropriate. Any balance or deficit remaining on July 1 must be carried over to the next fiscal year.

**PART C**

**ASSESSMENT DISTRICT DIAGRAM**

Assessment District

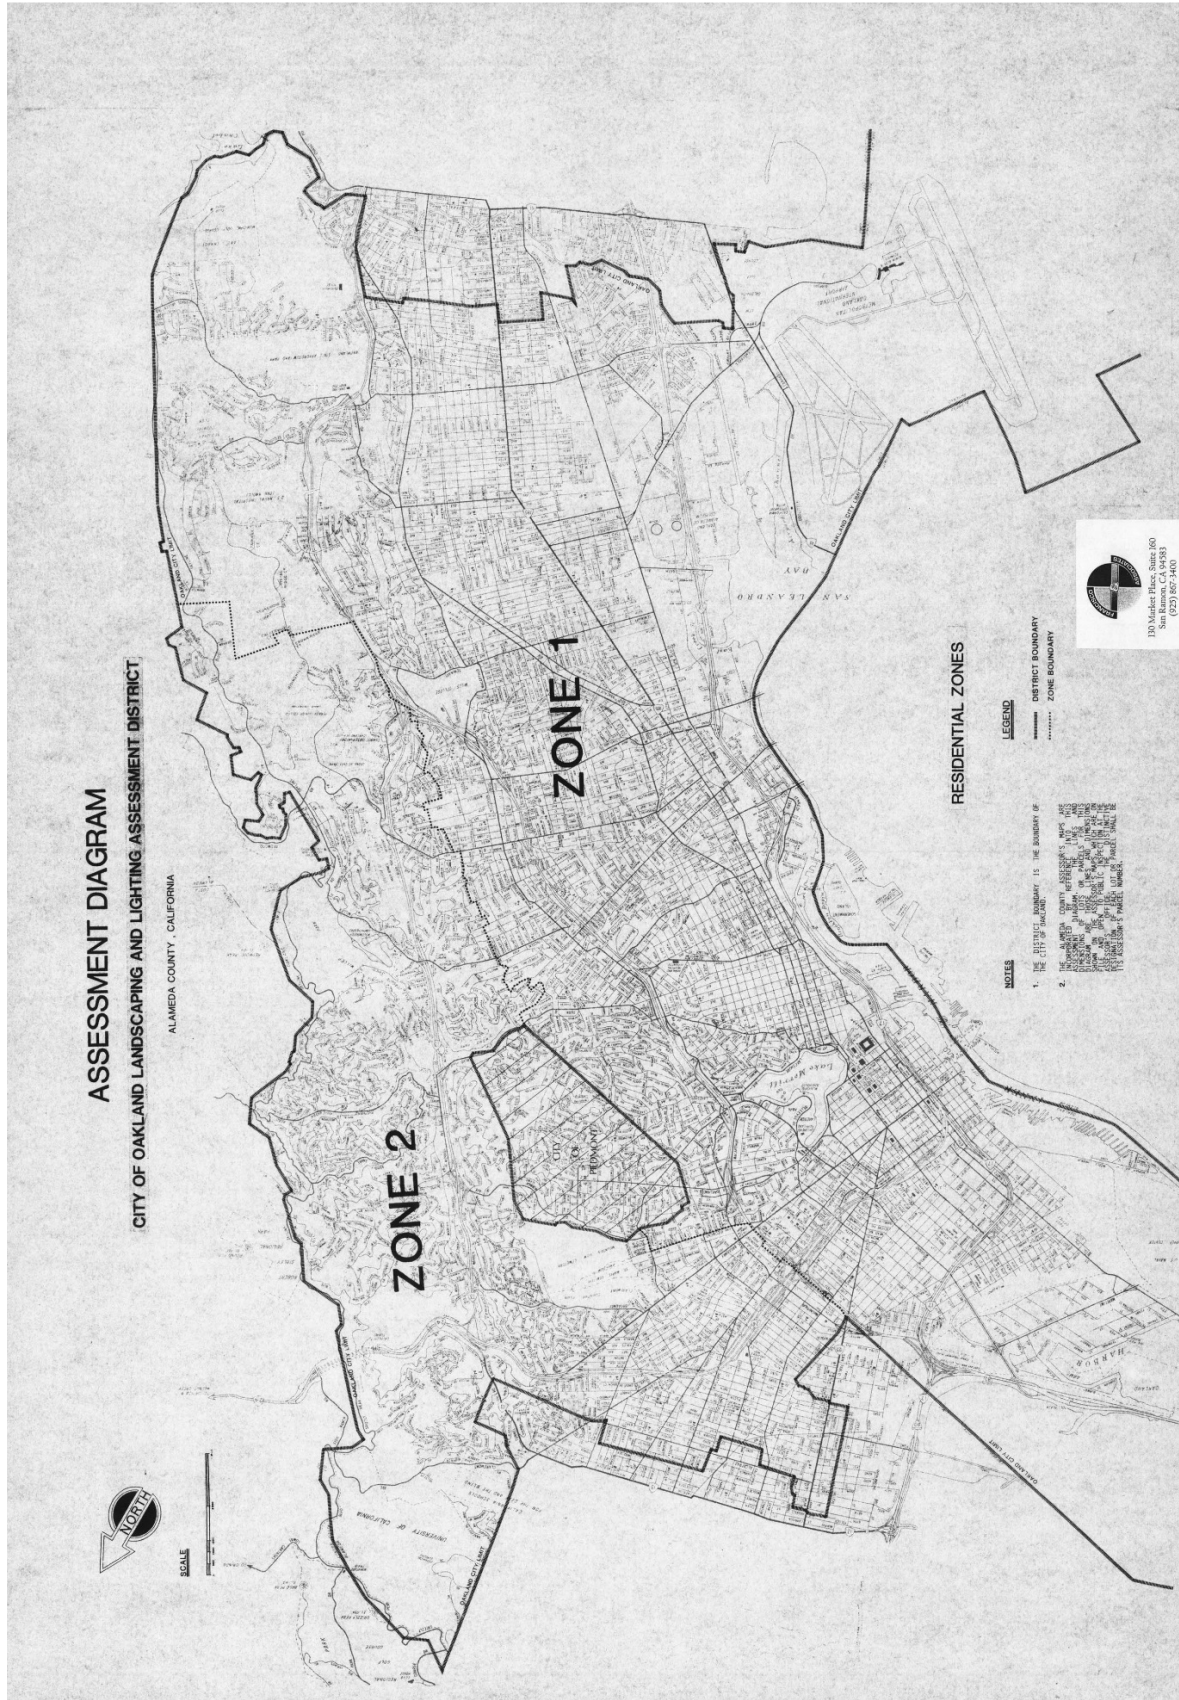

The boundaries of the City of Oakland's Landscaping and Lighting Assessment District coincide with the boundaries of the City of Oakland and encompass all parcels of land within the City. The District Diagram is located on the following pages of this Report.

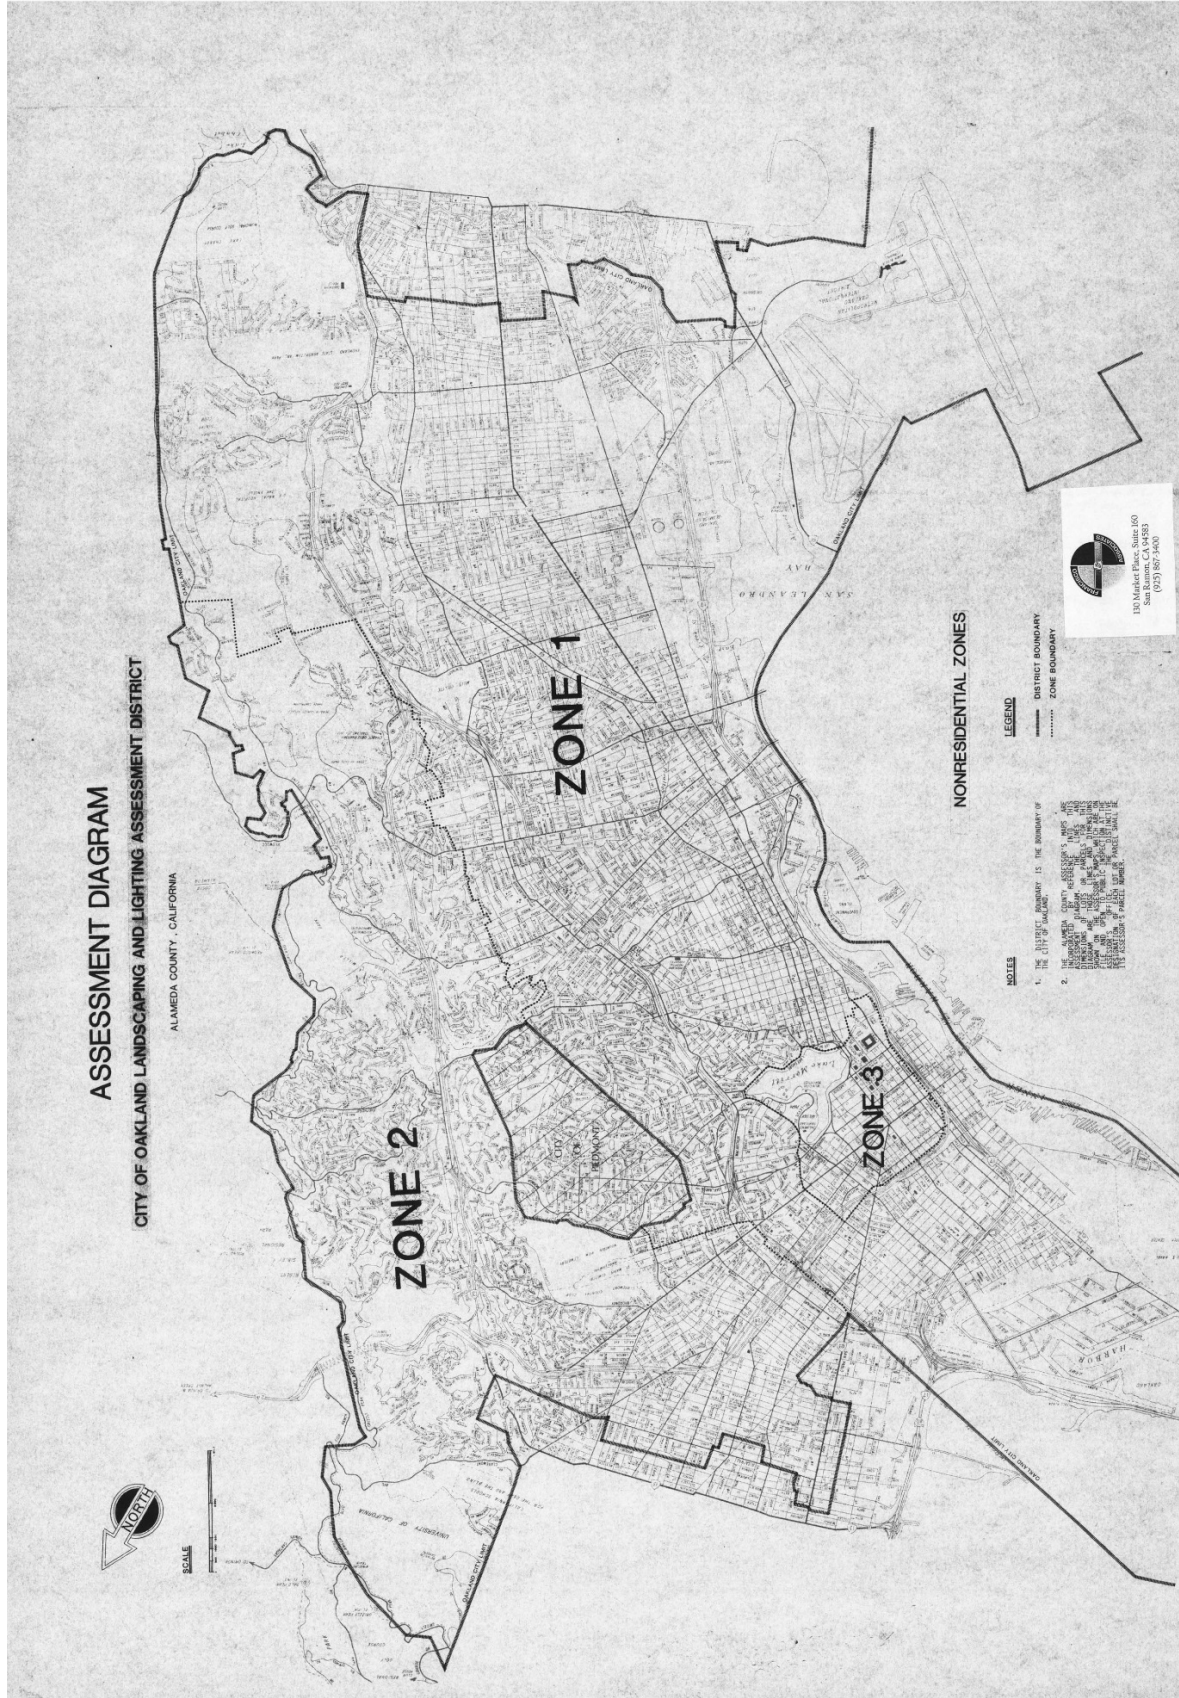

The District Diagram presents the District boundary, the Zones of Benefit, and City streets. The lines and dimensions of each parcel of land within the District, are those lines and dimensions of the Assessor's parcel maps on file at the Alameda County Assessor's office. The Assessor's maps are incorporated by reference into the Assessment Diagram. The Assessor's parcel number is adopted as the distinctive designation of each lot or parcel.

Benefit Zone Boundaries

The District is divided by two benefit zone systems, residential and non-residential. Consequently, the District Diagram is presented in two sheets, one depicting residential Benefit Zones 1 and 2, and the other depicting non-residential Benefit Zones 1, 2, and 3. For each sheet of the Assessment District Diagram, the dividing line between Benefit Zones 1 and 2 generally begins at I-580 and the northerly City Park District Limits, then continues easterly along I-580 and northerly along Piedmont Avenue to the City Limits of Piedmont. It then generally begins at Park Boulevard and the southerly boundary of Piedmont and meanders southerly to State Road 13 near Seminary Avenue, and easterly to the Oakland City Limits.

Non-residential Benefit Zone 3 encompasses the downtown business district generally bordered by Grand Avenue, El Embarcadero, Lakeshore Avenue, the Nimitz Freeway, Highway 24 and 27<sup>th</sup> Street.

**PART D**

**METHOD OF APPORTIONMENT OF ASSESSMENT**

**GENERAL**

The Landscaping and Lighting Act of 1972 permits the establishment of assessment districts by agencies for the purpose of providing, maintaining, and servicing certain public improvements, which include the construction, maintenance, and servicing of street lights, traffic signals, landscaping facilities, and park and recreational facilities.

Section 22573 of the 1972 Act requires that assessments be levied according to benefit rather than according to assessed value. This section states:

*“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable parcels in proportion to the estimated benefits to be received by each parcel from the improvements.”*

The 1972 Act permits the designation of zones of benefit within any individual assessment district if “by reasons or variations in the nature, location, and extent of the improvements, the various areas will receive different degrees of benefit from the improvements”.

**SPECIAL BENEFIT DETERMINATION**

**Street Lighting**

The proper functioning of street lighting is imperative for the welfare and safety of property located adjacent to or near the street lights throughout the City. Proper operation, maintenance, and servicing of a street lighting system benefits the adjacent properties by providing increased illumination for ingress and egress to property, safe pedestrian traveling at night, improved security, and protection to the property.

**Landscaping**

Trees, landscaping, hardscaping, and appurtenant facilities, if well maintained, provide beautification, shade and aesthetic enhancement of the surroundings to the adjacent properties, and therefore, directly increase property desirability and value. In Parkways and Land Values, written by John Nolan and Henry V. Hubbard in 1937, it is stated:

*“ . . . there is no lack of opinion, based on general principals and experience and common sense, that parkways do in fact add value to property, even though the amount cannot be determined exactly... Indeed, in most cases where public money has been spent for parkways, the assumption has been definitely made that the proposed parkway will show a provable financial profit to the City.”*

It should be noted that the definition of “parkways” above includes all roadway landscaping including medians and entranceways.

**Parks and Recreation**

Park and Recreational facilities provide a special and direct benefit to properties located near or adjacent to the park and recreational facilities. These park and recreational facilities enable the adjacent property owners to participate in sporting events, leisure activities, picnics, organized social events, and other neighborly activities. Since these parcels are located within close proximity of the park and recreational facilities, these parcels realize a direct increase in property values. Property values increase more when the park and recreational facilities are in place, improved, operable, safe, clean, and well maintained near or adjacent to their parcels. Conversely, property values decrease when park and recreational facilities are non-existent, unsafe, or destroyed by the elements or vandalism.

Studies in a number of neighborhoods and communities, including counties and cities throughout the United States, have indicated that recreation and recreational facilities, if well maintained, have caused an increase in the property values within the community. These studies confirm the opinion long held by planning authorities as to the economic value to parcels from park and recreational facilities located nearby.

*“The recreation value is realized as a rise in the value of land and other property in or near the recreation area, is of both private interest to the landowner and others holding an economic stake in the area, and of public interest to the taxpayers, who have a stake in a maximum of total assessed values.” (National Recreation and Park Association, June 1985)*

**BENEFIT ZONES**

Benefit zones have been established to distinguish geographic areas with differing degrees of benefit received by parcels of similar size and use. These distinctions arise from variations in the nature, location, and extent of improvements. Within a benefit zone, parcels of similar size and use are estimated to receive the same degree of benefit. For the City of Oakland Landscaping and Lighting Assessment District, two benefit zone systems are used: one for residential parcels and one for non-residential parcels.

**Street Lighting Improvements**

The Oakland City Council established minimum standards for residential street lighting that are uniformly applied throughout the City. In addition, it was determined that residential properties receive additional benefit from the increased street lighting located on collector and arterial streets. Because all residences benefit from a portion of collector and arterial lighting, 30 percent of these lighting costs were attributed to residential properties and therefore included in the residential assessments at the time of formation. In addition, for non-residential parcels, a distinction is necessary for benefits received from street lighting. Throughout the City, street lighting is similar among non-residential areas. One exception to this similarity in lighting among non-residential areas is the downtown area, which is more intensely lighted than other non-residential areas. To account for this difference in lighting intensity, Benefit Zone 3, encompassing the central business district, was created for non-residential properties.

**Landscaping Improvements**

Because of the variation in density of roadway, median and parkway landscaping throughout the City, the District is divided into two benefit zones. Assessment rates for benefit zones were established at time of formation based on parcels located within their respective benefit zones paying for the landscaping costs located within that benefit zone based upon the methodology detailed within this Report.

**Parks and Recreation**

Finally, a long-standing system of City Park Maintenance Districts provides another basis for placement of benefit zone boundaries. These park and recreational benefit zone boundaries were established on the basis of location and density of park and recreational improvements, in an effort to establish areas requiring equivalent input of resources.

For residential and non-residential parcels, it is appropriate to make the same distinction between Benefit Zones 1 and 2 for benefits received from park improvements. In addition to distinguishing lighting intensity, the Benefit Zone 3 boundary serves another purpose: the highest density of park improvements is in the downtown area. Downtown improvements include Lake Merritt. Clearly, areas outside Benefit Zone 3 also benefit from the downtown improvements. Portions of the Benefit Zone 3 park and recreational benefits were therefore attributed to Benefit Zones 1 and 2.

Assessment rates at the time of formation were derived off estimates of the benefits received from the park & recreational improvements located within Benefit Zone 3, based on interviews with City staff and other persons possessing extensive knowledge of City parks and their usage. Fifty percent of park & recreational improvements located within Benefit Zone 3 benefit the non-residential and residential parcels located within Benefit Zone 1, twenty-five percent of the park & recreational improvements located within Benefit Zone 3 benefit the non-residential parcels located in Benefit Zone 3, and twenty-five percent of the park & recreational improvements located within Benefit Zone 3 benefit the non-residential and residential parcels located within Benefit Zone 2.

In summary, several zones of benefit were established as follows:

Zone 1	Residential
Zone 1	Non-Residential
Zone 2	Residential
Zone 2	Non-Residential
Zone 3	Non-Residential

**SPECIAL BENEFIT ALLOCATION**

Each parcel is assigned Equivalent Dwelling Units (EDUs) in proportion to the estimated benefit the parcel receives from the lighting, landscape, and park improvements. The total number of EDUs is then divided into the annual revenue requirement to determine the cost per EDU.

Calculation of the EDUs to be allocated to each parcel is based upon land use (intensity of development), street frontage and parcel size.

**Single Family**

Since the single-family parcel represents over 64% of the total assessable parcels within the District, it is used as the basic unit of assessment and is defined as **1.00 EDU (one Equivalent Dwelling Unit)**. Single family parcels are defined as parcels that have a land use classification as single family residential with the Alameda County Assessor’s Office.

**Condominium**

Condominium parcels are considered **0.75 EDUs** due to their reduced population density and size of structure relative to the typical single family residence. Condominium parcels are defined as parcels that have a land use classification as condominium, attached planned unit development or co-op with the Alameda County Assessor’s Office.

**Mobile Home Parks**

Mobile home parcels are considered **0.75 EDUs** due to their reduced population density and size of structure relative to the typical single family residence. Mobile home parcels are defined as parcels that have a land use classification as mobile home with the Alameda County Assessor’s Office.

**Multi-Family**

Multi-family residential parcels are also given a reduction of EDUs because of their reduced benefit received as the number of units increase. By decreasing the equivalency factor as the number of units increases, a reasonable benefit assessment per parcel is achieved. The equivalency factors for multi-family parcels are shown in Table No. 6 below. Multi-family parcels are defined as parcels that have a land use classification as multi-family, which includes duplexes, triplexes, apartments, etc., with the Alameda County Assessor’s Office.

Table 6: Multi-Family Residential EDU Calculations			
Number or Range of Units Per Parcel	Single-Family Equivalent Benefits Per Unit	Number or Range of Units Per Parcel	Single-Family Equivalent Benefits Per Unit
2	0.700	31-34	0.514
3	0.650	35-39	0.511
4	0.600	40-44	0.508
5	0.550	45-49	0.505
6	0.547	50-59	0.502
7	0.544	60-69	0.499
8	0.541	70-79	0.496
9	0.538	80-99	0.493
10	0.535	100-129	0.490
11	0.532	130-159	0.487
12	0.529	160-199	0.484
13-15	0.526	200-249	0.481
16-19	0.523	250-299	0.478
20-24	0.520	300-349	0.475
25-30	0.517	350-500	0.472

**Commercial and Institutional**

The commercial and institutional land use category represents the largest non-residential category. Although the parcel area and frontage equating to the benefit received by a single family residential parcel is incapable of exact determination, reasoned judgment establishes estimates resulting in fair assessments. Commercial and institutional parcels are generally defined as parcels that have a land use classification as commercial or institutional with the Alameda County Assessor’s Office. Institutional land uses include but are not limited to schools, churches, and hospitals.

Parcel area and frontage for an “average” single family parcel are approximately 3,200 sq. ft. and approximately 40 feet, respectively. If one further estimates that the benefits received by a “typical” single family parcel are attributable to one-half of its street frontage and one-half of its parcel area, the 0.50 EDUs should be allocated for each 3,200 sq. ft. of parcel area and 0.50 EDUs should be allocated to each 40 feet of street frontage. It is this range of estimates that is applied to the commercial/institutional and industrial (see below) land use categories.

As noted in the following table and illustrated in the example calculation, one EDU benefit is attributed to a commercial/institutional parcel for each 80 feet of frontage and for each 6,400 square feet of parcel area.

Table 7: Area & Frontage EDUs by Land Use Category			
Land Use Category	Frontage (FT)	Area (SF)	Building Area (SF)
Commercial/ Institutional	80	6,400	N/A
Industrial	100	10,000	N/A
Public Utilities	1,000	100,000	N/A
Golf Course	1,000	200,000	N/A
Quarry	1,000	250,000	N/A
Tall Buildings > 5 Stories	80	6,400	5,000

Below is an example benefit estimation for a commercial or institutional parcel with a frontage of 160 feet and an area of 12,800 square feet:

<u>Frontage</u>		<u>Area</u>		
<u>160 FT</u>		<u>12,800 SF</u>		
80 FT/SFE	+	6,400 SF/SFE =	=	4.00 SFE Benefit Units

**Industrial**

Predominantly industrial areas are generally less intensely lighted than are predominantly commercial areas. This less intense lighting is accounted for by using larger frontage and area factors to represent the unit benefit. Moreover, basic differences in land use result in less benefit being received per unit area or frontage by industrial uses than for commercial or institutional uses. Industrial uses are typically less intense, requiring greater areas and generating fewer occupants and pedestrians than commercial or institutional uses. In addition, the enhanced image created by the presence of parks and landscaping is generally more important to commercial and institutional uses than to industrial uses.

For the industrial land use category, estimates are taken from the other end of the range discussed above. One EDU benefit is represented by 100 feet of frontage and by 10,000 square feet of parcel area. It is estimated that, for a given increment of frontage or area, an industrial parcel benefits less than a commercial or institutional parcel. The distinction in frontage or area per unit benefit is designed to take this difference into account.

**Non-Residential Condominiums**

There are a number of condominiums with use codes in the commercial and industrial land use categories. Parcel area and frontage data from the Assessor's parcel maps pertain to a condominium complex as a whole. This data was used to compute an assessment for the total complex. A third variable, each parcel's percentage interest in the condominium, was derived from documents in the County Recorder's Office and was used to prorate the assessment for the total complex to the individual condominium units.

**Tall Non-Residential Buildings**

Tall non-residential buildings make relatively intense use of public lighting, landscaping, and parks because of their high rates of occupancy and pedestrian generation. Because of the small ratio of building footprint to floor area for a tall building, the benefits received from this intense use are not fairly measured by parcel area and frontage alone. In estimating the benefits received by tall buildings, area and frontage measures are supplemented by net rentable area of the building.

A tall building is defined as a building of more than five stories. For tall buildings, the normal benefit computation is performed on the basis of parcel area and frontage. Added to that result is an estimated additional benefit of one EDU per 5,000 SF of net rentable area. To avoid unreasonably large benefit estimates for tall buildings on large parcels, a maximum estimated benefit of 100 EDU's is established.

**Public Utilities**

Properties owned or leased by investor-owned public utilities are established as a separate land use category. Many of the parcels in this category have large areas and frontages and would receive unreasonably large assessments unless a distinction is made in the frontage and area representing a unit benefit. Most of these parcels contain equipment and facilities that receive relatively little benefit from public lighting, landscaping, and parks. These parcels were allocated 1.00 EDU of benefit for each 1,000 FT of frontage and for each 100,000 SF of area.

**Golf Courses**

Golf Course parcels represent very large areas and frontages. Most of the area involving golf courses is permanent open space. Golf courses do contain clubhouses and other structures and do benefit from public lighting, landscaping, and parks, but estimation of their benefits requires a formula different from that applied to other land uses. The golf courses are allotted 1.00 EDU of benefit for each 1,000 FT of frontage and for each 200,000 SF of area.

**Quarries**

Quarry parcels are typically very large and derive little benefit from the District’s improvements. Among all use categories, quarries are estimated to receive the least benefit per frontage and area and are allotted 1.00 EDU of benefit for each 1,000 FT of frontage and 250,000 SF of parcel area.

**Exempt**

Exempted from the assessment would be public streets, public avenues, public lanes, public roads, public drives, public courts, public alleys, public easements and rights-of-way, public greenbelts and public parkways, open space, and all other public property.

**SUMMARY OF ASSESSMENTS**

The methods described above are applied to estimate the benefits received by each assessable parcel in the District from lighting, landscaping, parks, and recreational improvements. These estimates are expressed as Equivalent Dwelling Units (EDU). The total of equivalent dwelling units for each Zone is then computed for both residential and non-residential land uses. A Summary of Single-Family EDUs by Zone and General Land Use is presented below.

Table 8: Summary of Equivalent Dwelling Units By Benefit Zone and Land Use			
Benefit Zone	Residential	Non-Residential	Combined
1	96,124.00	26,795.05	122,919.05
2	33,426.43	5,614.15	39,040.58
3	N/A	4,549.56	4,549.56
Total	129,550.43	36,958.77	166,509.20

These EDU benefits are then divided into the appropriate budget item subtotal (see Cost Estimate) to obtain the assessment for lighting and for parks and landscaping, for residential and non-residential uses in each Benefit Zone. A Summary of Assessment Rates for One Equivalent Dwelling Unit Benefit by Zone and General Land Use is as follows:

Table No. 9 - Summary of Assessment Rates For One Equivalent Dwelling Unit By Zone and Land Use		
<b>Zone 1</b>		
	<b>Residential</b>	<b>Non-Residential</b>
Lighting	\$11.87	\$24.44
Landscaping/ Parks	<u>\$90.77</u>	<u>\$88.36</u>
Total	\$102.64	\$112.80
<b>Zone 2</b>		
	<b>Residential</b>	<b>Non-Residential</b>
Lighting	\$11.99	\$24.76
Landscaping/ Parks	<u>\$99.55</u>	<u>\$97.24</u>
Total	\$111.54	\$122.00
<b>Zone 3</b>		
	<b>Residential</b>	<b>Non-Residential</b>
Lighting	N/A	\$40.71
Landscaping/ Parks	N/A	<u>\$189.79</u>
Total	N/A	\$230.50

The assessment for a particular parcel is computed by multiplying that parcel's EDU's by the assessment rate shown above. The total assessment revenues for residential and non-residential parcels within each Zone are presented in the following table:

Table 10: Summary of Assessment Revenue By Benefit Zone and Land Use			
Benefit Zone	Residential	Non-Residential	Combined
1	\$9,866,167	\$3,022,482	\$12,888,649
2	\$3,728,384	\$684,927	\$4,413,311
3	<u>N/A</u>	<u>\$1,048,675</u>	<u>\$1,048,675</u>
Total	\$13,594,551	\$4,756,084	\$18,350,635

**PART E**

**PROPERTY OWNER LIST & ASSESSMENT ROLL**

A list of names and addresses of the owners of all parcels, and the description of each lot or parcel within the City of Oakland Landscaping and Lighting Assessment District is shown on the last equalized Property Tax Roll of the Alameda County Assessor, which by reference is hereby made a part of this report.

This list is keyed to the Assessor's Parcel Numbers as shown on the Assessment Roll, which includes the proposed amount of assessments for Fiscal Year 2021-22 apportioned to each lot or parcel. The Assessment Roll is on file in the Office of the City Clerk of the City of Oakland and is shown in this Report as Appendix "A".

APPENDIX 'A'

FISCAL YEAR 2021-22 ASSESSMENT ROLL

(Under separate cover and on file with the City Clerk)
