OFFICE OF THE CITY CLERA CITY OF OAKLAND AGENDA REPORT

2010 APR 15 PM 3: 58

TO:

Office of the City Administrator

ATTN: FROM: DATE: Dan Lindheim Budget Office April 27, 2010

RE:

Resolution Of Intention to Levy Assessments, Acceptance of the Fiscal Year 2010-11 Preliminary Engineer's Report for the City Of Oakland Landscaping And Lighting Assessment District, and Setting June 1, 2010 as the Date for a

Public Hearing

SUMMARY

A resolution has been prepared declaring the City Council's intent to levy and collect assessments from the Landscaping and Lighting Assessment District (LLAD) for FY 2010-11, accept the Preliminary Engineer's Report for the LLAD, and set a public hearing date for June 1, 2010 at 6:30 p.m. The FY 2010-11 Preliminary Engineer's Report for the LLAD prepared by Francisco & Associates, Inc., the District Engineer, is included as **Attachment A**.

FISCAL IMPACT

There is no direct fiscal impact from City Council action on this report. However, City Council action continues the process for assessing and collecting revenues from the LLAD for FY 2010-11. For FY 2010-11, the Preliminary Engineer's Report projects revenues of \$18.6 million from the LLAD. Revenues are used to support City services directly related to the installation, maintenance and servicing of public landscaping and lighting. LLAD expenditures for FY 2010-11 are projected to be \$18.4 million.

The service and cost of preparing the Engineer's Report is included in the contractual agreement with Francisco & Associates, Inc., which was approved by the City Council, Resolution No. 81740 C.M.S., on January 6, 2009 and expires on December 31, 2010.

BACKGROUND

The California Landscaping and Lighting Act of 1972 (California Streets and Highways Code Sections 22500-22509) allows local government agencies to form assessment districts for the purpose of financing the costs and expenses of landscaping and lighting public areas. The City of Oakland formed a Landscaping and Lighting Assessment District on June 23, 1989. In 1993, Oakland voters reconfirmed its existence. The LLAD, utilizing a direct benefit assessment, provides a funding source for city parks, grounds and medians, open space, pools, and custodial services at 25 park and recreation centers and field restrooms. The LLAD also supports activities

	Item:
Financ	e and Management Committee
	April 27, 2010

outside the Public Works Agency such as community gardens, ball field maintenance, and museum landscape maintenance.

In addition, the LLAD supports the ongoing maintenance of all Park and Recreation facilities including the structures and accessory uses such as the 76 tot lots, water fountains, bleachers, park furniture, and many other outdoor features. The LLAD funds the utility costs for the City's street lights and all park and field-related water use.

The California Streets and Highways Code, Sections 22620-22631, applies to all assessments that are to be levied and collected for a fiscal year. The code describes the requirements for levying assessments as follows:

- 1. Request a preliminary engineer's report describing any proposed new improvements or any substantial changes in existing improvements. (The resolution of initiation was discussed at the Finance and Management Committee of April 13, 2010 and is scheduled for adoption by the City Council on April 20, 2010.)
- 2. Approve the Engineer's Report and adopt a resolution of intention. The resolution of intention declares the City Council's intention to levy and collect assessments within the LLAD for the fiscal year. It also states whether the assessment is proposed to change from the previous year and sets a date, hour, and place for a public hearing. (This step is the subject of this report and resolution.)
- 3. Conduct the public hearing affording all interested parties the opportunity to hear and be heard. (Staff proposes that the public hearing occur on June 1, 2010 at 6:30 p.m., or as soon thereafter as the item may be heard, in the City Council Chambers.)
- 4. Upon completion of the public hearing on June 1, 2010, adopt a resolution confirming the information in the Engineer's Report and the levy of the assessment within the LLAD for the 2010-11 fiscal year.

The City of Oakland collects the LLAD assessment through the County of Alameda property tax bill. Upon fulfillment of the requirements for the LLAD, the City of Oakland must submit the assessment roll to the Alameda County Auditor-Controller Agency by August 10, 2010 for inclusion in the FY 2010-11 property tax roll.

KEY ISSUES AND IMPACTS

The proposed resolution states that the City Council does not intend to increase assessments for the LLAD for FY 2010-11. The current assessment rate structure has been in place since FY 1993-94. The following table, taken directly from the Preliminary Engineer's Report, summarizes the assessment rates for one equivalent dwelling unit benefit by zone and general

	Item:
Finance and Ma	nagement Committee
	April 27, 2010

land use. Zones, zone maps and rates calculations are included in the attached Draft Engineer's Report. (Attachment A)

Summary of Assessments for For One Equivalent Dwelling Unit Benefit By Zone and General Land Use

Benefit Zones	Residential	Non-Residential		
Zone 1 – Lighting	\$11.87	\$24.44		
Zone 1 – Landscaping/Parks	\$90.77	\$88.36		
Total Zone 1	\$102.64	\$112.80		
Zone 2 – Lighting	\$11.99	\$24.76		
Zone 2 – Landscaping/Parks	\$99.55	\$97.24		
Total Zone 2	\$111.54	\$122.00		
Zone 3 – Lighting	N/A	\$40.71		
Zone 3 – Landscaping/Parks	N/A	\$189.79		
Total Zone 3	N/A	\$230.50		

On April 3, 2007, the City Council adopted Resolution No. 80510 C.M.S. which included a provision for a five-year phased out elimination, beginning in FY 2007-08, of the current subsidies for private schools, churches, hospitals and agricultural parcels, with the current low-income exemption remaining in place. The Preliminary Engineers Report projects revenue of \$585,990 for FY 2010-11 from the fourth year subsidy phase-out.

There is one attachment to the Preliminary Engineer's Report that is not included because of its large size. Appendix A of the report is the FY 2010-11 Assessment Roll, a document that lists all properties within the assessment district by Assessor's Parcel Number and identifies each property's use code and assessment amount. The FY 2010-11 Assessment Roll is on file with the City Clerk.

Pursuant to the California Streets and Highways Code, the City Council must hold a public hearing to provide an opportunity for any interested party to be heard. Staff proposes that the date of the public hearing be set for Tuesday, June 1, 2010 at 6:30 p.m., or as soon thereafter as the item may be heard, in the City Council Chambers.

	Item:
Finance and	Management Committee
	April 27, 2010

Fund Balance

The LLAD Fund is projected to have a negative fund balance of \$6.56 million at the end of FY 2009-10. On October 21, 2008, the City Council adopted Resolution No. 81630 C.M.S. to address the negative fund balance through one-time revenues from land sales. However, on May 19, 2009, pursuant to Resolution No. 82031 C.M.S., the City Council reallocated those revenues in balancing measures to address projected deficits in the General Purpose Fund. No new plan to eliminate the negative fund balance has been proposed at this time. On March 23, 2010 it was reported to the Finance and Management Committee that the LLAD fund balance is categorized as a "negative fund requiring one-time revenues".

Operating Costs

As reported in the FY 2009-10 Second Quarter Revenue and Expenditure report to the City Council on March 2, 2010, the LLAD net expenditures are projected to exceed net revenue by \$0.39 million. The overspending is primarily due to personnel expenditures. Staff reductions in November 2008 and July 2009 have resulted in a very low vacancy rate, which has prevented budgeted position vacancy rate savings from being realized.

In addition, a 39% reduction in Tree Services has left personnel in an emergency response mode. All routine tree pruning was eliminated leading to increased after-hours calls, which are responded to through the use of overtime. Service responses are purely reactive to hazardous tree abatement and limb removal which pose emergency health and safety concerns. The PWA is in the process of reviewing deployment plans in an effort to reduce the costs of emergency calls.

Fiscal Year 2011-13

A parcel tax was under consideration during the FY 2009-11 budget cycle, but was postponed to November 2010. Staff will bring forward a report for consideration proposing a Park, Tree, and Lighting Parcel Tax or other alternative funding options during the next budget cycle.

SUSTAINABLE OPPORTUNITIES

There are no direct economic, environmental, or social equity opportunities or impacts associated with the City Council action requested in this report.

DISABILITY AND SENIOR CITIZEN ACCESS

LLAD revenues support the installation, maintenance, and servicing of public parks and recreational facilities, and provides landscaping improvements, which are made accessible to persons with disabilities and seniors in accordance with the Americans with Disabilities Act.

RECOMMENDATION(S) AND RATIONALE

Staff recommends that the City Council approve the proposed resolution. ,

ACTION REQUESTED OF THE CITY COUNCIL

Staff recommends that the City Council approve the attached Resolution of Intention, accept the Fiscal Year 2010-11 Preliminary Engineer's Report for the City of Oakland Landscaping and Lighting Assessment District, and set June 1, 2010 as the date for a Public Hearing.

Respectfully submitted,

CHERYL TAYLOR

SECTION I

INTRODUCTION

ENGINEER'S REPORT

CITY OF OAKLAND

LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT

FISCAL YEAR 2010-11

Background Information

The Landscape and Lighting Assessment District was originally formed on June 23, 1989 and subsequently approved by the registered voters of the City of Oakland in 1994. This District, utilizes direct benefit assessments as a funding source for the operation and maintenance of landscaping, park and recreation facilities, and street lighting within the City of Oakland.

An Engineering analysis was performed in 1989 to ensure the costs for funding the operation, maintenance, and servicing of improvements were apportioned to each parcel within the City based upon the special benefits they received from the improvements. Payment of the assessment for each parcel is made in the same manner and at the same time as payments are made for property taxes. All funds collected through the assessment are placed in a special fund and are only used for the purposes stated within this Engineer's Report.

As required by the Landscaping and Lighting Act of 1972, the Engineer's Report includes: (1) a description of the improvements to be operated, maintained and serviced by the District, (2) an estimated budget for the District, and (3) a listing of the proposed Fiscal Year 2010-11 assessments to be levied upon each assessable lot or parcel within the District.

The City of Oakland will hold a Public Hearing on June 1, 2010, regarding the District which will provide an opportunity for any interested person to be heard. At the conclusion of the Public Hearing, the City Council may adopt a resolution confirming the assessment rates as originally proposed or as modified.

SECTION II

ENGINEER'S REPORT PREPARED PURSUANT TO THE PROVISIONS OF THE LANDSCAPING AND LIGHTING ACT OF 1972

SECTION 22500 THROUGH 22679

OF THE CALIFORNIA STREETS AND HIGHWAY CODE

CITY OF OAKLAND LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT

FISCAL YEAR 2010-II

Pursuant to the Landscaping and Lighting Act of 1972 (Part 2 of Division 15 of the Streets and Highways Code of the State of California), the Act, and in accordance with Resolution of Intention, being Resolution No. _______, adopted April 27, 2010 by the City Council, of the City of Oakland, State of California, and in connection with the proceedings for:

CITY OF OAKLAND LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT

Hereinafter referred to as the "Assessment District" or "District", I, Joseph A. Francisco, P.E., the authorized representative of Francisco & Associates, Inc., and the duly appointed Engineer of Work, submit herewith the "Report" consisting of five (5) parts as follows:

PART A: PLANS AND SPECIFICATIONS

This part describes the improvements to be operated, maintained and serviced within the District. For a more detailed description of the improvements, refer to the listing of improvements on file in the Public Works Agency, which are incorporated herein by reference.

PART B: ESTIMATE OF COST

This part contains an estimate of the cost of the proposed improvements that are supported by assessment revenues for FY 2010-11, including incidental costs and expenses. For a more detailed cost estimate of the improvements, refer to the cost estimate on file in the Public Works Agency, which are incorporated herein by reference.

PART C: ASSESSMENT DISTRICT DIAGRAM

This part incorporates a Diagram of the Assessment District showing the exterior boundaries of the District, the boundaries of any zones within the District, and the lines and dimensions of each lot or parcel of land within the District, are incorporated herein and are on file in the Office of the Oakland City Clerk. The lines and dimensions of each lot or parcel within the Assessment District are those lines and dimensions shown on the maps of the Assessor of the County of Alameda for the fiscal year when this Report was prepared.

PART D: METHOD OF APPORTIONMENT OF ASSESSMENT

This part describes the method of apportionment of assessments which was developed when the assessment district was formed in 1989. The method of apportionment is based upon parcel classification of land, and location within the District, in proportion to the estimated benefit to be received.

PART E: PROPERTY OWNER LIST & ASSESSMENT ROLL

This list contains a list of the Assessor Parcel numbers of Alameda County, and the net amount to be assessed upon the benefited lands within the District for FY 2010-11. The Assessment Roll is filed in the Office of the Oakland City Clerk and is incorporated in this Report by reference. The list is keyed to the records of the Alameda County Assessor, which are incorporated herein by reference.

PART A

PLANS AND SPECIFICATIONS

The facilities and improvements that have been constructed and those that may be subsequently constructed within the District, which will be maintained and serviced consist of: street lighting; landscaping; public park and recreation facilities; and appurtenant facilities including, but not limited to, personnel, electrical energy, utilities such as water, materials, contractual services, and other items necessary for the facilities.

Street Lighting:

The street lighting system includes all street lights within the public right-of-way, easements, and other exterior lighting which is not part of a building system. Street lights and appurtenant facilities include, but are not limited to, poles, fixtures, bulbs, conduits, equipment including guys, anchors, posts, pedestals, and metering devices as required to provide safe lighting within the boundaries of the District. The locations of street lighting improvements are shown on a Street Light Base Map kept on file at the City's Electrical Engineering Section. There are more than 34,000 streetlights on residential, arterial, and collector streets, plus several hundred other public lights along pathways and outside buildings. Undergrounding projects, in accordance with PG&E programs, when warranted, are also included in the District improvements.

As lights are installed and upgraded, the District's operating and maintenance costs are impacted. Cost estimates prepared by the Public Works Agency, take into account the projected additional energy and maintenance costs for improvements to be installed during FY 2010-11.

Public Park and Recreational Facilities:

The public park and recreational facilities, and landscape improvements, which are located within the incorporated limits of the City of Oakland, will be operated, maintained, and serviced by the District. Public park and recreational facilities include, but are not limited to: landscaping; irrigation systems; hardscapes; plazas; street trees; sidewalks; trails; fixtures; and appurtenant facilities including but not limited to lights, playground equipment, including tot lots, play courts, public restrooms, sports fields, sports courts, parkways; and designated easements; and buildings or structures used for the support of park and recreational programs such as, but not limited to, recreation centers, swimming pools, picnic facilities, water-based recreation facilities, and nature oriented facilities.

All landscaping, park, and recreational improvements in Oakland, maintained by the City on public lands, are included in the District. The District includes approximately 2,300 acres of street, park, and plaza landscaping including scenic Joaquin Miller Park, Lake Merritt, Mandela Parkway and Union Point Park; 75,000 street trees; more than 130 City park and public grounds; and 25 recreation, community and interpretive centers.

Tables 1, 2, and 3 on the following pages, present a partial list of the District's landscaping, and park and recreational facilities by each Benefit Zone. This list is not exclusive and many small facilities (e.g., street channels and islands) are not included. The benefit zones are those depicted on the Assessment Diagram for Residential and Nonresidential Zones.

Maintenance means the furnishing of services and materials for the ordinary and usual operations, maintenance and servicing of the landscaping, street lighting, public park, and recreational facilities and appurtenant facilities, including repair, removal or replacement of all or part of any of the landscaping, street lighting, public park and recreational facilities, or appurtenant facilities; providing for the life, growth, health, and beauty of the landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, and treating for disease or injury; and the removal of trimmings, rubbish, debris, and other solid waste. Servicing means the furnishing of water for the irrigation of the landscaping, and the maintenance of any street lighting facilities or appurtenant facilities and the furnishing of electric current or energy, gas, or other illuminating agent for the street lighting, public park, and recreational facilities or appurtenant facilities.

The plans and specifications for the improvements are on file in the Public Works Agency of the City of Oakland.

PART B

ESTIMATE OF COST

The City's FY 2010-11 Baseline Budget Summary for the District is shown below in Table 4.

^{*} Negative Fund Balance will not be eliminated by using future LLAD assessments, but instead from other funds

The 1972 Act provides that the total cost for operations, maintenance and servicing of those facilities or improvements, which provide a "special benefit" to the parcels can be recovered in the assessment spread including incidental expenses. These incidental expenses include but are not limited to engineering fees, legal fees, printing, mailing, postage, publishing, etc.

In addition to the \$17.8 million in revenue which is proposed to be collected through assessments, the City will also be financing approximately \$4.77 million in additional landscape and lighting district expenditures. This City contribution will be used to offset costs that are attributable to the general benefits received to the public at large.

The District's total assessment revenue allocation by benefit zone is shown below in Table 5. The location of the zones of benefit and the method of apportionment are described in Part D of this Report.

Table'5: ASSESSMENTS BY BENEFIT ZONE							
	Zone 1 Budget Non		Zone 2 Budget		Zone 3	Total	
				Non	Non	All	
DESCRIPTION	Residential	Residential	Residential	Residential	Residential	Zones	
Lighting	\$1,086,754	\$663,960	\$390,248	\$131,766	\$193,137	\$2,465,865	
Landscaping	\$8,310,418	\$2,400,469	\$3,240,133	<u>\$517,485</u>	\$900,405	\$15,368,910	
Total Estimated Assessments	\$9,397,172	\$3,064,429	\$3,630,382	\$649,251	\$1,093,542	\$17,834,775	

The 1972 Act requires that a special fund be set up for the revenues and expenditures of the District. Funds raised by the assessment shall be used only for the purpose as stated herein. A contribution to the District by the City may be made to reduce assessments, as the City Council deems appropriate. Any balance or deficit remaining on July 1 must be carried over to the next fiscal year.

PART C

ASSESSMENT DISTRICT DIAGRAM

Assessment District

The boundaries of the City of Oakland's Landscaping and Lighting Assessment District coincide with the boundaries of the City of Oakland and encompass all parcels of land within the City. The District Diagram is located on the following pages of this Report.

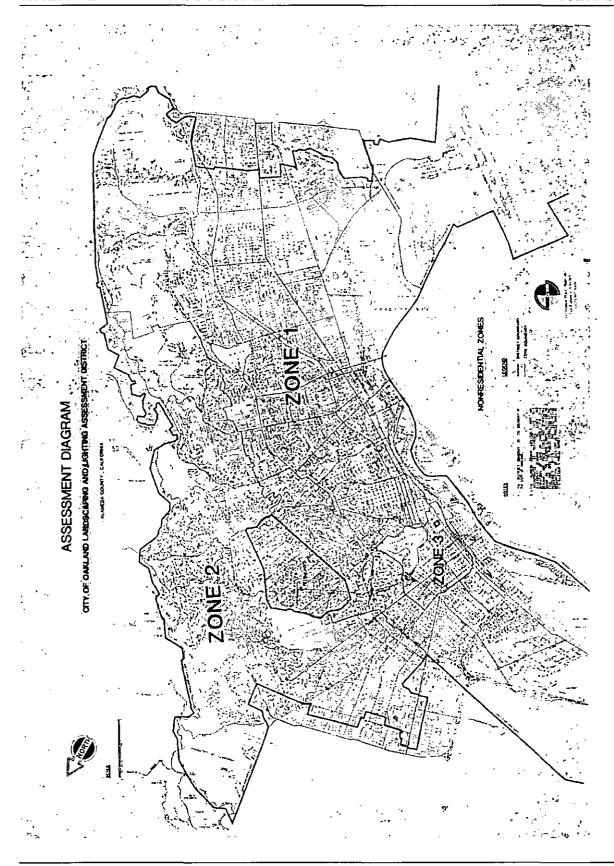

The District Diagram presents the District boundary, the Zones of Benefit, and City streets. The lines and dimensions of each parcel of land within the District, are those lines and dimensions of the Assessor's parcel maps on file at the Alameda County Assessor's office. The Assessor's maps are incorporated by reference into the Assessment Diagram. The Assessor's parcel number is adopted as the distinctive designation of each lot or parcel.

Benefit Zone Boundaries

The District is divided by two benefit zone systems, residential and non-residential. Consequently, the District Diagram is presented in two sheets, one depicting residential Benefit Zones I and 2, and the other depicting non-residential Benefit Zones I, 2, and 3. For each sheet of the Assessment District Diagram, the dividing line between Benefit Zones I and 2 generally begins at I-580 and the northerly City Park District Limits, then continues easterly along I-580 and northerly along Piedmont Avenue to the City Limits of Piedmont. It then generally begins at Park Boulevard and the southerly boundary of Piedmont and meanders southerly to State Road I3 near Seminary Avenue, and easterly to the Oakland City Limits.

Non-residential Benefit Zone 3 encompasses the downtown business district generally bordered by Grand Avenue, El Embarcadero, Lakeshore Avenue, the Nimitz Freeway, Highway 24 and 27th Street.

Francisco & Associates, Inc.

PART D

METHOD OF APPORTIONMENT OF ASSESSMENT

GENERAL

The Landscaping and Lighting Act of 1972, permits the establishment of assessment districts by Agencies for the purpose of providing, maintaining, and servicing certain public improvements, which include the construction, maintenance, and servicing of street lights, traffic signals, landscaping facilities and park and recreational facilities.

Section 22573 of the 1972 Act requires that assessments be levied according to benefit rather than according to assessed value. This section states:

"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable parcels in proportion to the estimated benefits to be received by each parcel from the improvements."

The 1972 Act permits the designation of zones of benefit within any individual assessment district if "by reasons or variations in the nature, location, and extent of the improvements, the various areas will receive different degrees of benefit from the improvements".

SPECIAL BENEFIT DETERMINATION

Street Lighting

The proper functioning of street lighting is imperative for the welfare and safety of property located adjacent to or near the streetlights throughout the City. Proper operation, maintenance, and servicing of a street lighting system benefits the adjacent properties by providing increased illumination for ingress and egress to property, safe pedestrian traveling at night, improved security and protection to the property.

Landscaping

Trees, landscaping, hardscaping, and appurtenant facilities, if well maintained, provide beautification, shade and esthetic enhancement of the surroundings to the adjacent properties, and therefore, directly increase property desirability and value. In <u>Parkways and Land Values</u>, written by John Nolan and Henry V. Hubbard in 1937, it is stated:

"... there is no lack of opinion, based on general principals and experience and common sense, that parkways do in fact add value to property, even though the amount cannot be determined exactly. Indeed, in most cases where public money has been spent for parkways, the assumption has been definitely made that the proposed parkway will show a provable financial profit to the City."

It should be noted that the definition of "parkways" above includes all roadway landscaping including medians and entranceways.

Parks and Recreation

Park and Recreational facilities provide a special and direct benefit to properties located near or adjacent to the park and recreational facilities. These park and recreational facilities enable the adjacent property owners to participate in sporting events, leisure activities, picnics, organized social events, and other neighborly activities. Since these parcels are located within close proximity of the park and recreational facilities, these parcels realize a direct increase in property values. Property values increase more when the park and recreational facilities are in place, improved, operable, safe, clean, and well maintained near or adjacent to their parcels. Conversely, property values decrease when park and recreational facilities are non-existent, unsafe, or destroyed by the elements or vandalism.

Studies in a number of neighborhoods and communities, including counties and cities throughout the United States, have indicated that recreation and recreational facilities, if well maintained, have caused an increase in the property values within the community. These studies confirm the opinion long held by planning authorities as to the economic value to parcels from park and recreational facilities located nearby.

"The recreation value is realized as a rise in the value of land and other property in or near the recreation area, is of both private interest to the landowner and others holding an economic stake in the area, and of public interest to the taxpayers, who have a stake in a maximum of total assessed values." (National Recreation and Park Association, June 1985)

BENEFIT ZONES

Benefit zones have been established to distinguish geographic areas with differing degrees of benefit received by parcels of similar size and use. These distinctions arise from variations in the nature, location, and extent of improvements. Within a benefit zone, parcels of similar size and use are estimated to receive the same degree of benefit. For the City of Oakland Landscaping and Lighting Assessment District, two benefit zone systems are used; one for residential parcels and one for non-residential parcels.

Street Lighting Improvements

The Oakland City Council has established minimum standards for residential street lighting that are uniformly applied throughout the City. The District's lighting budget includes funds to maintain all residential streets at these standards. In addition, the residential properties receive some additional benefit from the increased street lighting located on collector and arterial streets. Because all residences benefit from a portion of the collector and arterial lighting, 30 percent of these lighting costs are included in the residential assessments. In addition, for non-residential parcels, a distinction is necessary for benefits received from street lighting. Throughout the City, street lighting is similar among non-residential areas. One exception to this similarity in lighting among non-residential areas is the downtown area, which is more intensely lighted than are other non-residential areas. To account for this difference in lighting intensity, Benefit Zone 3 encompassing the central business district, is created for non-residential properties.

Landscaping Improvements

Because of the variation in density of roadway, median and parkway landscaping throughout the City, the District is divided into two benefit zones. Parcels located within their respective benefit zones will pay for the landscaping costs located within that benefit zone based upon the methodology detailed within this Report.

Parks and Recreation

Finally, a long-standing system of City Park Maintenance Districts provides another basis for placement of benefit zone boundaries. These park and recreational benefit zone boundaries were established on the basis of location and density of park and recreational improvements, in an effort to establish areas requiring equivalent input of resources.

For residential and non-residential parcels, it is appropriate to make the same distinction between Benefit Zones 1 and 2 for benefits received from park improvements. In addition to distinguishing lighting intensity, the Benefit Zone 3 boundary serves another purpose, the highest density of park improvements is in the downtown area. Downtown improvements include Lake Merritt. Clearly, areas outside Benefit Zone 3 also benefit from the downtown improvements. Portions of the Benefit Zone 3 park and recreational benefits are therefore attributed to Benefit Zones 1 and 2.

Estimates of the benefits received from the park & recreational improvements located within Benefit Zone 3 were based on interviews with City staff and other persons possessing extensive knowledge of City parks and their usage. Fifty percent of park & recreational improvements located within Benefit Zone 3 benefit the non-residential and residential parcels located within Benefit Zone 1, twenty-five percent of the park & recreational improvements located within Benefit Zone 3 benefit the non-residential parcels located in Benefit Zone 3, and 25 percent of the park & recreational improvements located within Benefit Zone 3 benefit the non-residential and residential parcels located within Benefit Zone 2.

In summary, several zones of benefit are established as follows:

Zone I	Residential
Zone 1	Non-Residential
Zone 2	Residential
Zone 2	Non-Residential
Zone 3	Non-Residential

SPECIAL BENEFIT ALLOCATION

Each parcel is assigned Equivalent Dwelling Units (EDUs) in proportion to the estimated benefit the parcel receives from the lighting, landscape, and park improvements. The total number of EDUs is then divided into the annual revenue requirement to determine the cost per EDU.

Calculation of the EDUs to be allocated to each parcel is based upon land use (intensity of development), street frontage and parcel size.

Single Family

Since the single-family parcel represents over 64% of the total assessable parcels within the District, it is used as the basic unit of assessment and is defined as 1.00 EDU (one Equivalent Dwelling Unit). Single family parcels are defined as parcels that have a land use classification as single family residential with the Alameda County Assessor's Office.

Condominium

Condominium parcels are considered 0.75 EDUs due to their reduced population density and size of structure relative to the typical single family residence. Condominium parcels are defined as parcels that have a land use classification as condominium, attached planned unit development or co-op with the Alameda County Assessor's.

Mobile Home Parks

Mobile home parcels are considered 0.75 EDUs due to their reduced population density and size of structure relative to the typical single family residence. Mobile home parcels are defined as parcels that have a land use classification as mobile home with the Alameda County Assessor's.

Multi-Family

Multi-family residential parcels are also given a reduction of EDUs because of their reduced benefit received as the number of units increase. By decreasing the equivalency factor as the number of units increases, a reasonable benefit assessment per parcel is achieved. The equivalency factors for multi-family parcels are shown on Table No. 6 below. Multi-family parcels are defined as parcels that have a land use classification as multi-family, which includes duplexes, triplexes, apartments, etc., with the Alameda County Assessor's Office.

The state of the s	Table 6: Multi-Family R	ėsi	dential EDU Calculations 🛶 🤄	[1] " [1] [1] [1] [1] [1] [1] [1] [1] [1] [1]

9	0.538		80-99	0.493
10	0.535		100-129	0.490
11	0.532		130-159	0.487-
12	0.529		160-199	0.484
13-15	0.526		200-249	0.481
16-19	0.523		250-299	0.478
20-24	0.520		300-349	0.475
25-30	0.517		350-500	0.472

Commercial and Institutional

The commercial and institutional land use category represents the largest non-residential category. Although the parcel area and frontage equating to the benefit received by a single family residential parcel is incapable of exact determination, reasoned judgment establishes estimates resulting in fair assessments. Commercial and institutional parcels are generally defined as parcels that have a land use classification as commercial or institutional with the Alameda County Assessor's Office. These land use types include schools, churches and hospitals.

Parcel area and frontage for an "average" single family parcel are approximately 3,200 sq. ft. and approximately 40 feet respectively. If one further estimates that the benefits received by a "typical" single family parcel are attributable to one-half of its street frontage and one-half of its parcel area, the 0.50 EDUs should be allocated for each 3,200 sq. ft. of parcel area and 0.50 EDUs should be allocated to each 40 feet of street frontage. It is this range of estimates that is applied to the commercial/institutional and industrial (see below) land use categories.

As noted in the following table and illustrated in the example calculation, one EDU benefit is attributed to a commercial/institutional parcel for each 80 feet of frontage and for each 6,400 square feet of parcel area.

Land Use Category	Frontage (FT)	Area (SF)
Commercial/Institutional	80	6,400
Industrial	100	10,000
Public Utilities	1,000	100,000
Golf Course	1,000	200,000
Quarry	1,000	250,000

Example benefit estimation for a commercial or institutional parcel with a frontage of 160 feet and an area of 12,800 square feet:

<u>Frontage</u>		<u>Area</u>	
160 FT		12,800 SF	
80 FT/SFE	+	6,400 SF/SFE =	4 SFE Benefit Units

Industrial

Predominantly industrial areas are generally less intensely lighted than are predominantly commercial areas. This less intense lighting is accounted for by using larger frontage and area factors to represent the unit benefit. Moreover, basic differences in land use result in less benefit being received per unit area or frontage by industrial uses than for commercial or institutional uses. Industrial uses are typically less intense, requiring greater areas and generating fewer occupants and pedestrians than do commercial or institutional uses. In addition, the enhanced image created by the presence of parks and landscaping is generally more important to commercial and institutional uses than to industrial uses.

For the industrial land use category, estimates are taken from the other end of the range discussed above. One EDU benefit is represented by 100 feet of frontage and by 10,000 square feet of parcel area. It is estimated that, for a given increment of frontage or area, an industrial parcel benefits less than does a commercial or institutional parcel. The distinction in frontage or area per unit benefit is designed to take this difference into account.

Non-Residential Condominiums

There are a number of condominiums with use codes in the commercial and industrial land use categories. Parcel area and frontage data from the Assessor's parcel maps pertain to a condominium complex as a whole. This data were used to compute an assessment for the total complex. A third variable, each parcel's percentage interest in the condominium, was derived from documents in the County Recorder's Office and was used to prorate the assessment for the total complex to the individual condominium units.

Tall Non-Residential Buildings

Tall non-residential buildings make relatively intense use of public lighting, landscaping, and parks because of their high rates of occupancy and pedestrian generation. Because of the small ratio of building footprint to floor area for a tall building, the benefits received from this intense use are not fairly measured by parcel area and frontage alone. In estimating the benefits received by tall buildings, area and frontage measures are supplemented by net rentable area of the building.

A tall building is defined as a building of more than five stories. For tall buildings, the normal benefit computation is performed on the basis of parcel area and frontage. Added to that result is an estimated additional benefit of one EDU per 5,000 SF of net rentable area. To avoid unreasonably large benefit estimates for tall buildings on large parcels, a maximum estimated benefit of 100 EDU's is established.

Public Utilities

Properties owned or leased by investor owned public utilities are established as a separate land use category. Many of the parcels in this category have large areas and frontages and would receive unreasonably large assessments unless a distinction is made in the frontage and area representing a unit benefit. Most of these parcels contain equipment and facilities that receive relatively little benefit from public lighting, landscaping, and parks. These parcels were allocated 1.00 EDU benefit for each 1,000 FT of frontage and for each 100,000 SF of area.

Golf Courses

Golf Course parcels represent very large areas and frontages. Most of the area involving golf courses is permanent open space. Golf courses do contain clubhouses and other structures and do benefit from public lighting, landscaping and parks, but estimation of their benefits requires a formula different from that applied to other land uses. The golf courses are allotted 1.00 EDU benefit for each 1,000 FT of frontage and for each 200,000 SF of area.

Quarries

Two parcels have the use code for quarries. These parcels are very large and derive little benefit from the District's improvements. Among all use categories, quarries are estimated to receive the least benefit per frontage and area and are allotted 1.00 EDU benefit for each 1,000 FT of frontage and 250,000 SF of parcel area.

Exempt

Exempted from the assessment would be public streets, public avenues, public lanes, public roads, public drives, public courts, public alleys, public easements and rights-of-way, public greenbelts and public parkways, open space and all other public property.

SUMMARY OF ASSESSMENTS

The methods described above are applied to estimate the benefits received by each assessable parcel in the District from lighting, landscaping, parks, and recreational improvements. These estimates are expressed as Equivalent Dwelling Units (EDU). The total of equivalent benefit units for each Zone is then computed for both residential and non-residential land uses. A Summary of Single-Family EDUs by Zone and General Land Use is presented below.

Table 8: Summary of Equivalent Dwelling Units By Benefit Zone and General Land Use			
Benefit Zone	Residential	Non-Residential	Combined
ı	91,554.68	27,166.92	118,721.60
2	32,547.80	5,321.73	37,869.53
3	<u>N/A</u>	<u>4,744.22</u>	<u>4,744.22</u>
Total	124,102.48	37,232.86	161,335.34

These EDU benefits are then divided into the appropriate budget item subtotal (see Cost Estimate) to obtain the assessment for lighting and for parks and landscaping, for residential and non-residential uses in each Benefit Zone. A Summary of Assessments for One Equivalent Dwelling Unit Benefit by Zone and General Land Use is as follows:

Table No. 9 - Summary of Assessments
For One Equivalent Dwelling Unit
By Zone and General

Zone I	Reside ntial	Non-Residential
Lighting	\$11.87	\$24.44
Landscaping/Parks	\$90.77	\$88.36
Total	\$102.64	\$112.80

Zone 2	Residential	Non-Residential
Lighting	\$11.99	\$24.76
Landscaping/Parks	\$99,55	<u>\$97.24</u>
Total	\$111.54	\$122.00

Zone 3	Residential	Non-Residential
Lighting -	· N/A	\$40.71
Landscaping/Parks	N/A	<u>\$189.79</u>
Total	N/A	\$230.50

The assessment for a particular parcel is computed by multiplying that parcel's EDU's by the assessment rate shown above. The total assessment revenues for residential and non-residential parcels within each Zone are presented in the following table:

		y of Assessments	
Benefit Zone	Residential	Non-Residential	Combined
1	\$9,397,172	\$3,064,429	\$12,461,601
2	\$3,630,382	\$649,251	\$4,279,632
3	<u>N/A</u>	\$1,093,542	\$1,093,542
Total	\$13,027,554	\$4,807,221	\$17,834,775

PART E

PROPERTY OWNER LIST & ASSESSMENT ROLL

A list of names and addresses of the owners of all parcels, and the description of each lot or parcel within the City of Oakland Landscaping and Lighting Assessment District is shown on the last equalized Property Tax Roll of the Alameda County Assessor, which by reference is hereby made a part of this report.

This list is keyed to the Assessor's Parcel Numbers as shown on the Assessment Roll, which includes the proposed amount of assessments for FY 2010-11 apportioned to each lot or parcel. The Assessment Roll is on file in the Office of the City Clerk of the City of Oakland and is shown in this Report as Appendix "A".

APPENDIX 'A'

FY 2010-11 ASSESSMENT ROLL

(under separate cover and on file with the City Clerk)

OFFICE OF THE CITY CLERN OAKLAND 2010 APR 15 PM 3: 58

Approved as to Form and Legality

Oakland City Attorney's Office

OAKLAND CITY COUNCIL

Resolution No.	C.M.S.	

RESOLUTION OF INTENTION TO LEVY ASSESSMENTS, ACCEPTANCE OF THE FY 2010-11 PRELIMINARY ENGINEER'S REPORT FOR THE CITY OF OAKLAND LANDSCAPING AND LIGHTING ASSESSMENT DISTRICT, AND SETTING JUNE 1, 2010 AS THE DATE FOR A PUBLIC HEARING

WHEREAS, pursuant to the California Streets and Highways Code, Sections 22500, et seq., known as the Landscaping and Lighting Act of 1972, the City has taken a series of actions preliminary to ordering the establishment of the Landscaping and Lighting Assessment District ("District") and did establish such District on June 23, 1989; and

WHEREAS, pursuant to the California Streets and Highway Code Sections 22500, et seq., the City has renewed the District each subsequent year; and

WHEREAS, the voters of the City of Oakland previously approved the continuation of the District; and

WHEREAS, the City Administrator filed with the City Clerk and presented before the Finance and Management Committee of the City Council, on April 27, 2010, reports for the continuation of the Landscaping and Lighting Assessment District in order to raise revenues for the installation, maintenance, and servicing of public landscaping and lighting; and

WHEREAS, the District Engineer has submitted a Preliminary Engineer's Report for the District confirming the applicability of the existing assessment rates for FY 2010-11, which is on file with the City Clerk; now, therefore be it

RESOLVED: That the City Council intends to levy and collect assessments within the City of Oakland Landscaping and Lighting Assessment District for FY 2010-11, with no increase in assessments from prior years;

RESOLVED: That the City Council accepts the Preliminary Engineer's Report for the Landscaping and Lighting Assessment District, which describes the existing and proposed improvements and any substantial changes proposed to be made in existing improvements, for discussion purposes; and be it

FURTHER RESOLVED: That all the area of land to be assessed is located in the City of Oakland, Alameda County; and be it

FURTHER RESOLVED: That a public hearing is set for June 1, 2010 at 6:30 p.m., or soon thereafter as the item may be heard, in the City Council Chambers, Oakland City Hall, One Frank H. Ogawa Plaza, Oakland, California regarding the FY 2010-11 Landscaping and Lighting Assessment District and the levy of assessments; and be it

FURTHER RESOLVED: That the Office of the City Administrator is directed to publish notice of the public hearing no later than May 21, 2010.

IN COUNCIL, OAKLAND, CALIFORNIA,
