RE: **A Report And Resolution Granting 901 Jefferson Housing LLC A Revocable And Conditional Permit For A Building At 901 Jefferson Street To Allow A Vault and Electrical Transformer To Encroach Under The Public Sidewalk Along 9th Street**

SUMMARY

A resolution has been prepared granting 901 Jefferson Housing LLC, a California limited liability company (no. 200504510086) and owner of a building being constructed at 901 Jefferson Street, a conditional and revocable permit (ENMJ 06287) that will allow a concrete vault and electrical transformer to encroach under the public sidewalk along 9th Street.

FISCAL IMPACT

Staff costs for processing the proposed encroachment permits are covered by fees set by the Master Fee Schedule and paid by the developer and have been deposited in the special revenue Development Service Fund (2415), Engineering Services organization (88432), Encroachment Permits account (42314), Engineering and Architectural Plan Approval (PS30). The standard conditions of the encroachment permit require the property owner to maintain liability and property damage insurance and to include the City as a named insured.

PROJECT DESCRIPTION

The new mixed-use building (permit B0504607) is located on a one-half (0.5) acre site on Jefferson Street between 9th Street and 10th Street (APN 002-0025-018-00). The Planning Commission approved land use entitlements (CD 05201) on September 21, 2005. Parcel Map 9132 for seventy-five (75) residential condominiums was approved on August 28, 2006.

KEY ISSUES AND IMPACTS

Oakland Municipal Code Section 12.08.030 requires that applications for encroachments into the public right-of-way (basements, vaults, earth retaining structures, etc.) receive approval of the City Council as a condition of permit issuance. Pacific Gas and Electric requires that electrical transformers be installed in under-sidewalk vaults to facilitate its access and maintenance.

The proposed concrete vault will be approximately seven (7) feet wide and ten (10) feet long and will encroach into the public right-of-way approximately nine (9) feet. The electrical transformer will be accessed through removable covers set flush with the (12) feet wide sidewalk. The subsurface encroachment will not interfere with the public's use of the right-of-way nor with the maintenance of underground public utilities. The City Council has previously approved similar underground encroachments for other buildings throughout the City.

SUSTAINABLE OPPORTUNITIES

Economic

The project will provide opportunities for professional services and construction related jobs for the Oakland community.

Environmental

Land use approvals and construction permits for infrastructure and buildings require that the permittee comply with City ordinances and regional Best Management Practices for reducing nuisance noise, fugitive dust, construction debris disposal, and storm drainage pollutant runoff.

Social Equity

The addition of residential living units and commercial retail space will assist the economic revitalization of the downtown district.

DISABILITY AND SENIOR CITIZEN ACCESS

Construction permits will conform with State and City regulations for handicapped accessibility.

RECOMMENDATIONS

Staff recommends that the Committee accept this report and forward it to the City Council to adopt the proposed resolution approving a permit for an encroachment into 9th Street.

ACTION REQUESTED OF THE CITY COUNCIL

Staff recommends that the City Council accept this report and adopt the proposed resolution approving a conditional and revocable permit to allow a concrete vault and electrical transformer to encroach under the public sidewalk along 9th Street for a new building at 901 Jefferson Street.
