

GLADIATOR FORENSICS

THE NEXT GENERATION IN WIRELESS FORENSICS

GLADIATOR ENTERPRISE SENSOR PROCESSING & ANALYTICS (ESPA)

ESPA is our backbone solution that unifies case management, data storage and analytics from the entire suite of Gladiator tools. ESPA ingests data from call detail records, carrier specialized reports, cell tower files, public record APIs, pen registers, wiretaps, GPS tracking data, GPS ping data, LPR data and cellular downloads allowing investigators and analysts to build a complete and comprehensive assessment of communications.

ABOUT US

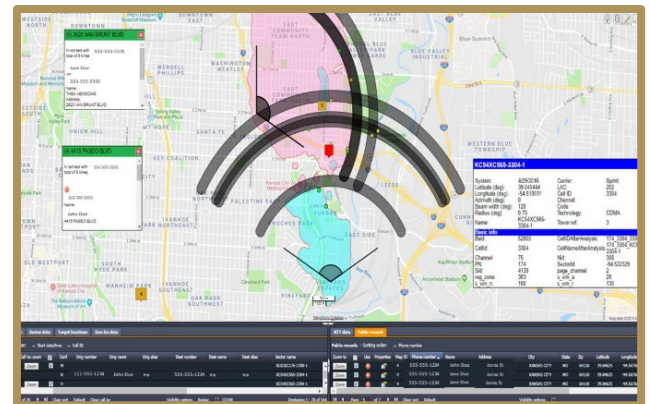

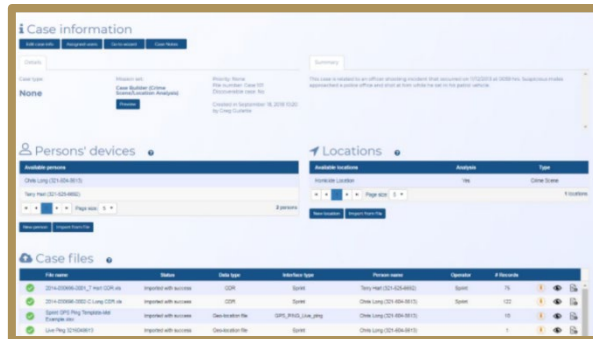

Gladiator Forensics is a telecom system engineering firm that provides specialized forensic intelligence collection and analytical tools. We provide a full spectrum of reliable solutions that produce immediate actionable intelligence to support case development and prosecutions in both state and federal courts.

OUR SOLUTIONS

The Gladiator OSS suite of tools is a top tier solution in use by some of the foremost experts in the country. Our solutions are configurable to support all access technologies globally including 2G/3G/4G/5G and Wi-Fi.

KEY FEATURES

- Case Management and file storage, to include GPS ping data from cellular service providers.
- Multi-source analysis including social media, CDRs, LPR, location data from Google, Uber, Garmin etc., and real-time PRTT/Wiretap
- Cellular and Wi-Fi coverage analysis with integrated RF drive data
- Link analysis
- Public records matching
- Automated reporting (Word and PowerPoint) and Narratives
- Video playback
- Provider lookup tool
- Cross case alerts
- Global database for target device, persons, locations, and cell site lists
- Designed for data integrity, so crucial evidence can be presented in court

CONTACT US

Phone: +1 (202) 465 – 4753

Email: sales@gladiator-forensics.com

Address: 100 Rialto Place, Suite 605
Melbourne, FL 32901

Web: www.gladiator-forensics.com

KEY BENEFITS

- ESPA allows investigators and analysts to conduct high level multi-source cellular communications analysis and visualize true RF coverage of cell sites and Wi-Fi locations
- ESPA is a court proven solution that is being utilized by some of the foremost experts in the country

GLADIATOR FORENSICS

THE NEXT GENERATION IN WIRELESS FORENSICS

ABOUT US

Gladiator Forensics is a telecom system engineering firm that provides specialized forensic intelligence collection and analytical tools. We provide a full spectrum of reliable solutions that produce immediate actionable intelligence to support case development and prosecutions in both state and federal courts.

OUR SOLUTIONS

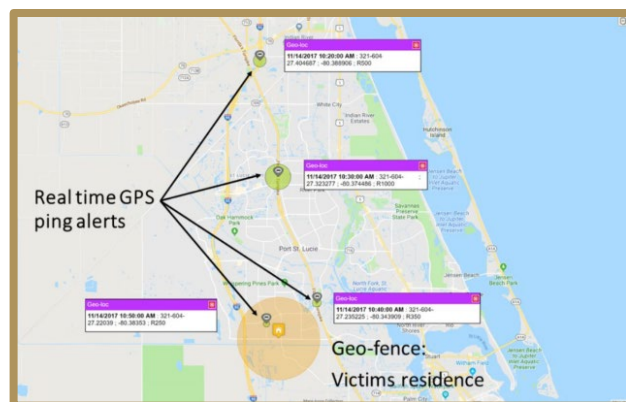

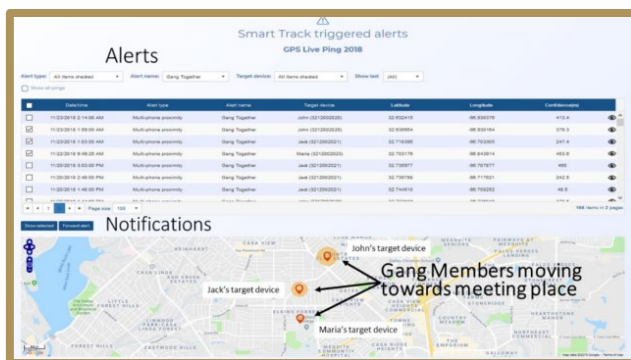

The Gladiator OSS suite of tools is a top tier solution in use by some of the foremost experts in the country. Our solutions are configurable to support all access technologies globally including 2G/3G/4G/5G and Wi-Fi.

GLADIATOR SMART TRACK

Smart Track is an automated live monitoring and alert system designed to ingest GPS pings, social media location alerts, geo location data, PRTT and additional data from the OSS suite of tools. Smart Track will collect and store original emails while sending customized alerts with interactive mapping for situation awareness. Specialized user defined alerts can be set that will notify investigators when an event happens, saving them the time and agony of reading and converting each email they receive.

KEY FEATURES

- Customizable alerts for geofence, reverse geofence, multi-phone proximity, accuracy, location change, phone on or off, identifier alert, new communication, and more
- Customized notification via email, SMS, or voice call
- Multiple users can receive alerts simultaneously, with a link to a map showing latitude/longitude and radius
- Daily customizable reports
- Customizable historical reports which retain original GPS ping emails for evidentiary purposes

KEY BENEFITS

- Smart Track allows investigators to eliminate wasted time opening and reading every GPS ping email, instead customizable notifications alert you when something important happens
- Smart Track can alert your investigator when two or more suspects are in the same location at the same time. Great alerts for airports, train stations and the border
- Smart Track alerts containing easy visualization of GPS ping and radius can be sent to your entire surveillance team, along with attached photos of suspect, vehicle and even ops plans

GLADIATOR FORENSICS

THE NEXT GENERATION IN WIRELESS FORENSICS

ABOUT US

Gladiator Forensics is a telecom system engineering firm that provides specialized forensic intelligence collection and analytical tools. We provide a full spectrum of reliable solutions that produce immediate actionable intelligence to support case development and prosecutions in both state and federal courts.

OUR SOLUTIONS

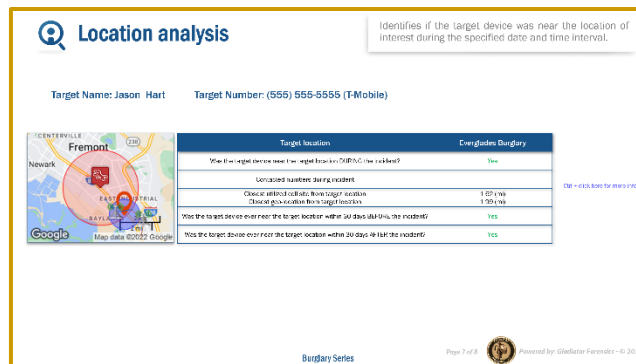

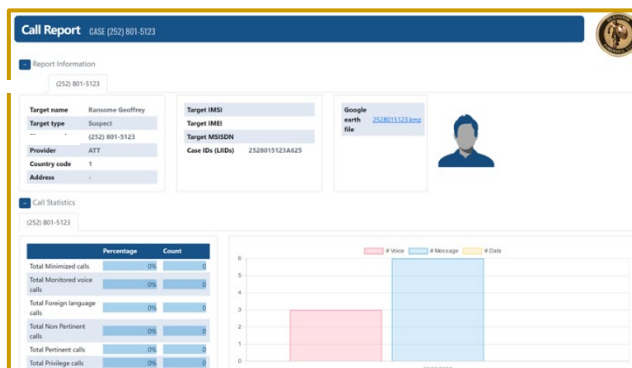

The Gladiator OSS suite of tools is a top tier solution in use by some of the foremost experts in the country. Our solutions are configurable to support all access technologies globally including 2G/3G/4G/5G and Wi-Fi.

GLADIATOR IQ REPORTS

IQ Reports are automated case creation, analysis, mapping, and reporting solutions that ingest data from multiple sources and synthesizes it into actionable intelligence presented in an interactive report. This solution allows minimally trained or seasoned personnel to get the answers they need quickly without waiting for an expert to conduct time intensive analysis.

KEY FEATURES

- Automated case creation via email, allowing you to work from your mobile phone
- Auto recognition of carrier formats, adjusting for network switch time zones
- Automated analysis with report outputs in PowerPoint or HTML
- Analysis includes:
 - Frequent number report
 - Frequent sector report
 - First / Last sector report
 - Call frequency by hour reports
 - Sector frequency by hour report
 - Common numbers report
 - Common locations report
 - Crime scene analysis
 - And more..

G-SCOUT MOBILE APP

The Gladiator G-Scout Mobile App is a powerful solution to visualize GPS pings and PRTT data from Sentinel. Our mobile app will incorporate all the functionality of the SRN external portal, from case creation to automated analysis reports for investigators working in the field.

KEY FEATURES

- iOS and Android compatible
- GPS ping visualization
- PRTT cell sector visualization
- Case viewer
- More coming soon...

GLADIATOR FORENSICS

THE NEXT GENERATION IN WIRELESS FORENSICS

ABOUT US

Gladiator Forensics is a telecom system engineering firm that provides specialized forensic intelligence collection and analytical tools. We provide a full spectrum of reliable solutions that produce immediate actionable intelligence to support case development and prosecutions in both state and federal courts.

OUR SOLUTIONS

GLADIATOR SENTINEL

Sentinel is a real-time electronic surveillance collection system for PRTT, T3 and T50. The solution is designed to process incoming CALEA data where it receives, stores, analyzes and presents this data in a user friendly and configurable grid with integrated mapping. Sentinel will display and map all available device activity to include registration, subscription, data sessions, start and end sectors as well as handoff sectors.

KEY FEATURES

- User friendly and customizable grids
- Multi-monitor support
- Message validation feature with CSPs
- Real-time HI2/HI3 IP traffic lookup
- Real-time public records lookup
- IP identification and IP lookup
- Easily navigate map to see towers, sectors, locations, search results, notes etc.
- GAR true cell site RF coverage integration
- Full audit trail
- Permissions based access
- Multiple tag options
- Multi-layer tools
- No loss of work
- Use with Smart Track and IQ Reports to provide unmatched automated intelligence
