

Walk this Way! The Broadway/Webster Project

City of Oakland, Bureau of Planning
June 2017

Neighborhoods severed from one another by I-880

Oakland is a city of underpasses

These underpasses are unsafe and uninviting.

Issues:

- Dark
- Noisy
- Poor air quality
- Confusing
- Fast moving freeway traffic
- Little signage for pedestrians
- Difficult to walk through
- Degraded
- Dead zones for local businesses

Call for Proposals: Transform the areas under, around and through Broadway and Webster Street Underpasses

RFP Scope

MULTI-DISCIPLINARY TEAMS:

- Urban Design
- Landscape Architect
- Transportation Engineer
- Sound Expert
- Public Engagement Expertise
- Structural Engineer
- Lighting Designer
- Environmental

SCOPE:

Will complete 2 phases of design:

- 1 • Detailed design drawings for Broadway and Webster St.
- Toolkit for other I-880 underpasses
- Community engagement
- Construction drawings (35%)

→ Formulate budget and pursue funding

- 2 • Construction documents for bidding (100%)

Transforming Broadway and Webster into safe, beautiful, inviting gateways is possible, and will add momentum to transformations at other underpasses
