The robbery data in **Attachment B** is hierarchy-based. Crime totals reflect one offense (the most severe) per incident. These statistics are drawn from OPD's database. They are unaudited and not used for crime numbers reported to the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting (UCR) program. This report is generated by the date in which the crimes occurred. Statistics can be affected by late reporting, the geocoding process, or the reclassification or un-founding of crimes. Because crime reporting and data entry can run behind actual crime occurrences, all crimes may not be recorded.
