## AGENDA REPORT

**TO:** JOHN A. FLORES  
INTERIM CITY ADMINISTRATOR

**FROM:** Bryan M. Sastokas

**SUBJECT:** Status of ITD Help Desk Requests  
and Projects for OPD

**DATE:** February 4, 2015

City Administrator  
Approval

Date

 7/25/15

**COUNCIL DISTRICT:** City-Wide

### RECOMMENDATION

Staff recommends that the City Council accept this informational report prepared at the request of Councilmember Desley Brooks on January 8, 2015. This report provides an analysis of all Help Desk requests made by the Oakland Police Department (OPD) to the Information Technology Department (ITD); the date of the request; the date the request was completed and the status of said request; if the request is incomplete, the anticipated completion date. Additionally, this Report provides a summary of the status of all OPD-related technology projects ITD is working on or has completed for the reporting period, which is January 1, 2014 to January 31, 2015.

### OUTCOME

The Public Safety Committee of the City Council reviews the current status of ITD's support of OPD and determines next steps relative to the report findings.

### EXECUTIVE SUMMARY

In response to the January 8, 2015 request from Councilmember Brooks, this report details the requested information regarding Information Technology Help Desk requests and regarding the status of ITD projects being done for the benefit of and in collaboration with OPD. Councilmember Brooks requested that the information be for the period of "January 2014 to the present," but, for the sake of clarity and practicality, the period for the information covered in this report is from January 1, 2014 to January 31, 2015.

In addition to the raw data, this report also provides additional context to assist in developing a more complete understanding of the data. For the Help Desk data, this includes comparisons

Item: \_\_\_\_\_  
Public Safety Committee Meeting  
March 10, 2015

between OPD Help Desk requests and those for the rest of the City. For the project data the context is provided by identifying the links between ITD/OPD projects and the major trends shaping the evolution of law enforcement technology. Finally, the presentation that will be provided during the Public Safety Committee meeting, one which provides further overall context, can be found in *Attachment A*.

### **Help Desk**

ITD maintains an IT Help Desk Call Center to provide all Level 1 technical support to City staff when they call 238-2000 for IT assistance. The Help Desk is a 9am to 5pm, Monday thru Friday, helpdesk operation and is composed of four technicians. Each time a City staff member (including OPD staff) contacts the Help Desk for support, the Help Desk technician records that request in an automated system. These requests – each of which is tracked – are commonly referred to as “tickets.” A summary of the January 1, 2014 to January 31, 2015 ticket data is below and a detailed list of the tickets is provided in *Attachments B & C*. Please note that OPD tickets are included in All-City totals and that ITD estimates that all open tickets will be closed within six weeks.

***Table 1: Help Desk Ticket Summary, Jan. 1, 2014 - Jan. 31, 2015***

|                                                      | OPD          | All City      | OPD %        |
|------------------------------------------------------|--------------|---------------|--------------|
| Approx. Number Full Time Equivalent Staff            | 1,200        | 4,800         | 25.0%        |
| <b>Total Help Desk Tickets (i.e., open + closed)</b> | <b>3,497</b> | <b>15,588</b> | <b>22.4%</b> |
| Open Help Desk Tickets                               | 388          | 1,246         | 31.1%        |
| Closed Help Desk Tickets                             | 3,109        | 14,342        | 21.7%        |
| Avg. # Of Days Closed Tickets Took to Close          | 29.8         | 14.0          | 12.9%        |
| <b>Avg. # Of Days Open Tickets Have Been Open</b>    | <b>118.8</b> | <b>172.9</b>  | <b>68.7%</b> |

### **Projects Overview**

Over the course of the requested period, ITD has completed 19 OPD-specific projects and 28 additional projects are still ongoing with various projected end dates (see *Attachments D & E* for a detailed listing of these projects). These numbers do not include a variety of *other* ITD projects which benefit the entire City *including OPD* (e.g., the project to roll-out Microsoft Office 365, Oracle R12 upgrade, Fiber Optic Master Plan, Enterprise Backup and Storage, Enterprise Geographic Information System, Citywide Pictometry, Data Centers modernization, new City web site, and reconstituting the ITD Project Management Office) nor do they take into account the ITD’s responsibilities to the Oakland Fire Department and for coordinating and occasionally collaborating with other state and local public safety agencies and regional entities (e.g., the Alameda County Sheriff’s Office, the California Department of Justice, the Port of Oakland, Oakland Unified School District Police Department, Oakland Housing Authority Police Department, BART Police, Piedmont Police & Fire, etc.).

ITD's role with respect to these projects is to assist in technical planning and implementation, but the Department also plays a role in collaborating with OPD in shaping project priorities by giving strategic guidance and counsel designed to keep OPD ahead of the technological curve. With the major technology and law enforcement trends as a focus, the table below contains a breakdown of ITD/OPD projects that takes some of these trends into account while also addressing some other basic topics like infrastructure maintenance, upgrades, legal, and regulatory compliance. For the sake of clarity in counting the number of projects, each project has only been assigned one trend/category, although many projects address multiple trends. A detailed listing of each project is provided in **Attachments D & E**.

**Table 2: Summary of ITD Projects for OPD, Jan. 1, 2014 to Jan. 31, 2015**

| Program                                                                                             | Projects In Progress | Projects Completed |
|-----------------------------------------------------------------------------------------------------|----------------------|--------------------|
| Mobility and Mobile Computing                                                                       | 6                    | 5                  |
| Intelligence-Led Policing/Predictive Analytics                                                      | 3                    | 0                  |
| Interoperability and Data Sharing                                                                   | 2                    | 1                  |
| Social Media                                                                                        | 1                    | 0                  |
| Existing Infrastructure Maintenance                                                                 | 8                    | 4                  |
| Regulatory/Legal Compliance                                                                         | 2                    | 0                  |
| New Infrastructure and/or Major Improvements to Existing Infrastructure (e.g., moving to the cloud) | 6                    | 9                  |
| <b>Sub-Totals</b>                                                                                   | <b>28</b>            | <b>19</b>          |
| <b>Grand Total</b>                                                                                  |                      | <b>47</b>          |

For a more in-depth discussion of these public safety technology trends and how they inform the ITD Public Safety Division program areas into which projects are organized, please refer to **Attachment F**.

#### **Large-Scale Projects**

From among the 47 projects mentioned above, 3 projects qualify as large-scale OPD projects worthy of separate mention and a more detailed status update (provided in the Analysis section below). They are:

1. Portable Radios, Infrastructure and the East Bay Regional Communications System Authority (EBRCSA):
2. Internal Personnel Assessment System, Next Generation (IPAS2):
3. Integrated Public Safety System, Next Generation (IPSS2):

## **BACKGROUND / LEGISLATIVE HISTORY**

The Information Technology Department is the central group within the City providing leadership, guidance and services relating to information technology. In 2007 a Public Safety Support Division within ITD was created to provide dedicated focus on the critical IT needs of the City's Police and Fire Departments, their staffs and facilities. This Public Safety Division (PSD) within ITD provides both strategic and technical resources in its collaborative work with Oakland's public safety departments.

The Public Safety Services Division (PSD) in ITD is responsible for business needs analysis, acquisition, designing, contract negotiations, installation, integration, project management, maintenance and support of Public Safety IT Systems. It is a One-Stop shop for all the Information Technology needs of Police and Fire departments in the City. There are more than 2000 public safety personnel combined in the Police and Fire Departments, who, day and night, rely on the technical and professional expertise of the ITD staff and use the emergency system supported and maintained by the dedicated PSD staff.

One of PSD's roles is to take into account major technological and public safety-specific trends and to work with the City's public safety departments to keep them at the forefront of those trends while also providing day-to-day support and maintenance services for the various elements of the existing infrastructure. Like most other departments in the City, ITD has been challenged in recent years to keep pace with the demand for its services given the significant cuts to staff and budgets that were necessary during the economic downturn. While ITD has been able to add back *some* staff that were cut, it is still quite challenging to provide all the services its stakeholders would like to have from the Department given currently available resources. Even with these limitations, ITD has successfully made (and continues to make) major contributions to the needs of OPD and OFD. This report will provide an overview of those accomplishments and challenges while also providing a description of what is still to come.

## **ANALYSIS**

As with any organization, ITD must prioritize the many demands on its limited resources so it can maximize the value it provides to its stakeholders. One element of doing that is to stay abreast of the major trends that are leading the evolution of both IT in general and of public safety technology specifically and to use that information to inform prioritization discussions with the Public Safety stakeholders. Understanding and staying ahead of these trends ensures that the City's public safety entities are planning for the future. There are many benefits possible through the effective use of technology in law enforcement, but what all of them have in common is the idea of technology as a "force multiplier" that enables a given individual or group

to accomplish far more on their own – and probably more quickly – than they ever could have before (even with more people).

### **The Current State of OPD Technology**

**Infrastructure** – The world of information technology is constantly evolving and the IT infrastructure that supports OPD must – over time – be constantly changing and improving to keep pace with this evolution. Given the OPD and ITD budget cuts necessitated during the recent economic downturn, City and OPD IT infrastructure did NOT keep pace, however, and the level of technology has fallen behind. As importantly, the IT personnel “infrastructure” necessary to continuously support and maintain the existing systems (and implement new ones) was also cut – to the point where the current staff is not sufficient to provide the level of IT services that OPD expects and deserves.

Since those cuts, however, the fiscal picture has been gradually improving and *some* long needed personnel and capital project resources have been provided. Many critical elements of the IT infrastructure have been upgraded since 2013 or are finally starting the process of being upgraded now. Recent example include upgrades to the public safety and City network infrastructure, updating OPD laptops and desktops, revamping OPD Dispatch Center, achieving City Council approval to commence the IPAS2 project to replace the current OPD Internal Personnel Assessment System and more.

While these recent improvements to the IT infrastructure are encouraging, the infrastructure still has many aging and out-of-date systems and areas that require additional time and resources to upgrade and/or replace. In addition to the existing infrastructure, there are other areas where *new* technologies should be introduced before the IT infrastructure can be characterized as “current with the state of the industry.” Even once brought current, the inevitable march forward of technological innovation and the related continuous evolution of the business needs of OPD will require ongoing investments in technology and personnel to support.

**Data Management** – As can be seen in *Attachment G*, there are over 100 software packages/systems in use by OPD that must be supported and maintained. Most of them, if not all, have data that is critical to the function of the software. Managing this data is a continuous challenge. Many of the existing system keep their data in disparate array of different databases – from Excel spreadsheets to Access databases to SQL databases to cloud-based data stores.

While this does not present a challenge in every case, there are many instances in which lack of data standardization, lack of data integration and/or lack of data integrity is creating unnecessary operational challenges & inefficiencies while also presenting severe challenges to the long-term supportability and sustainability of mission-critical data. The solution to this challenge is to address data as a critical enterprise-wide issue and build the enterprise platforms necessary to maintain that data in a standard, sustainable enterprise fashion.

While surmounting this challenge will likely take years, examples of where these kinds of efforts have already started are in the next generation internal personnel assessment system (IPAS2) and in the next generation integrated public safety system (IPSS2). In the IPAS2 project twelve disparate source data systems are currently being used by the current IPAS system and eight of them will be rewritten onto the Microsoft SharePoint Online platform with a common SQL Server back-end. Similarly, in the preliminary work to replace the aging IPSS system used across OPD, a critical element of the planned IPSS2 replacement system will be a crime data warehouse which will provide a standard, enterprise-accessible location to store many different sources of data in one central, enterprise-class database.

***Business/IT Vision and Resource Alignment*** – To achieve the vision of how technology can best benefit OPD, it is necessary to start not with technology, but with the business needs and requirements of OPD. OPD is a large organization with many divisions and groups and each of them has their own business requirements and ways in which technology can best benefit them. A past challenge in this regard – and still one that ITD and OPD must remain mindful of – is having a consistent, reliable and capable OPD resource(s) to build and maintain an integrated vision of prioritized OPD business requirements. Having this is crucial to ITD’s efforts to collaborate with OPD in bringing forth an integrated *technological* vision and the specific, tangible program and project roadmap necessary to properly support OPD needs.

As with the other two areas of focus above, there have been very real improvements in this area over the past couple of years, but much more improvement is needed if OPD and ITD are together going even to approach an ideal situation.

**Maintenance and Support Activities:**

While contributing its particular vision, leadership and strategy to the collaborative effort to ensure that Oakland’s public safety departments are prepared for the future is a critical element in ITD’s mission, it is equally important that ITD provide maintenance and support services for the existing elements of the OPD (and overall public safety) IT infrastructure.

To provide some context for this informational report on ITD’s recent public safety services, it is useful to understand the considerable size and scope of the overall existing infrastructure that ITD supports and maintains. It is also important to note that the 24/7/365 nature of public safety department activities places added demands on the nature of this infrastructure support. Please see *Attachment G* for a detailed breakdown of this infrastructure.

**Help Desk Services:**

ITD maintains an IT Help Desk Call Center to provide all Level 1 technical support to City staff (including OPD staff). The Help Desk is a 9am to 5pm, Monday thru Friday, staffed by four

full-time technicians. When a call or email initially comes in, the Help Desk Technician performs the Level 1 triage and troubleshooting to assist the caller. Once it is determined by the Help Desk Technician that the ticket requires escalation for additional assistance, he or she assigns it to the appropriate ITD Section for follow-up resolution. Escalated tickets are assigned by ITD Supervisors to various ITD technical staff members based on their relevant knowledge and skills, area of expertise, and availability.

In addition to the ITD Help Desk, City staff also relies on maintenance and support provided by vendors' Help Desk systems, by calling them directly, especially after hours and over the weekends. City has existing maintenance and support contracts with vendors such as Motorola, AT&T, Harris, Verizon, Aviat, Microsoft, and HP, some of which provide 24/7 monitoring and support services to our public safety mission critical systems. Because of the integration challenges among different Help Desk systems, resources required, and cost associated with this effort, a consolidation of the entire Help Desk data and reporting was never implemented. Though, it is important to note that there are thousands of OPD Help Desk tickets created by these external systems and ITD staff work on these issues till resolved.

It is also important to note that the Desktop and Laptop ITD support staff is situated at the Police Administration Building, and many minor IT related trouble tickets are resolved by them during the course of their informal interactions with OPD staff without being captured in the Help Desk system.

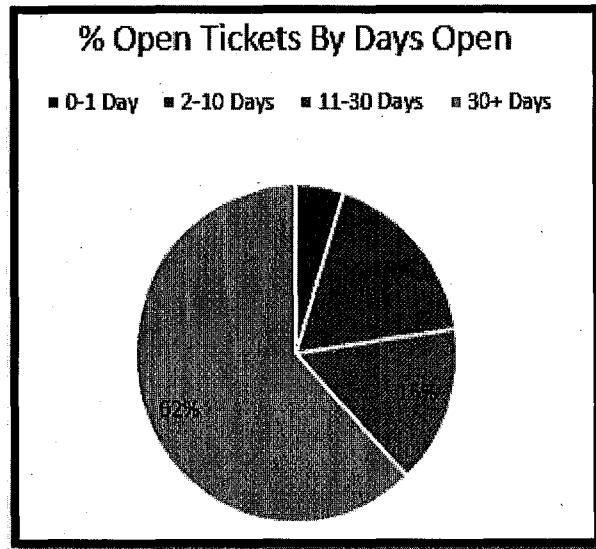

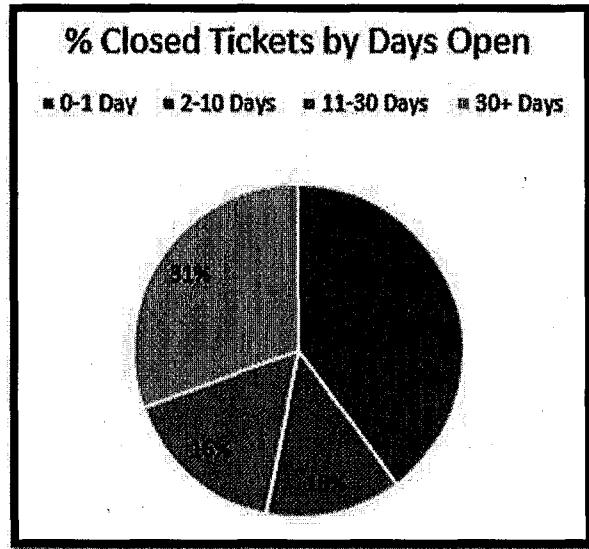

### **Analysis of Help Desk Tickets**

Along with the summary statistics in Table 1 above, it is instructive to compare data from the requested 13-month period to an analysis done previously on Help Desk tickets during Fiscal Year 2012-2013. The previous analysis was for *all* public safety tickets (i.e., it included help desk tickets for the Fire Department), but it's still an interesting comparison.

| Period                      | Total # Tickets | Tickets Closed | Closing Percentage |
|-----------------------------|-----------------|----------------|--------------------|
| FY 2012-2013 (OPD+OFD)      | 3,200           | 1,750          | 54.7%              |
| 1/1/14 – 1/31/15 (OPD Only) | 3,497           | 3,109          | 88.9%              |

While comparing a 12-month period for both departments to a 13-month period for OPD tickets is not a strict like-to-like comparison, it still strongly suggests that the number of OPD tickets being handled by the Help Desk has increased dramatically in the last few years as has Help Desk productivity as measured by overall ticket closing percentages.

Apart from analyzing the total number of tickets and the overall closing percentage, it's also useful to understand how long it takes tickets to close (or, if they are open, how long they have been open). Analyzing just the most recent OPD data, the following pie charts provide that breakdown.

About half of the tickets are closed and resolved in less than 10 days, whereas approximately 70% of the tickets are resolved in less than a month. It is important to note that a number of long-lead time request items (e.g., ordering new or replacement equipment) are also lumped into Help Desk tickets. ITD is in process of streamlining the Help Desk process; including enabling Self-Serve in the Help Desk system, redefining the call type categorization, and taking the long-lead time request items into a separate projects based workflow.

Further analysis with charts of the total number of open and closed tickets by category is provided in *Attachment H*.

#### **Status and Analysis of Large Scale Projects**

From among the 47 projects mentioned in the Executive Summary, 3 projects qualify as large-scale OPD projects. Detailed updates on these projects are provided below.

***Portable Radios, Infrastructure and the East Bay Regional Communications System Authority (EBRCSA)***: Phase 1 of this project is to replace the current public safety and public works portable radios with new Motorola APX Model P25 radios. The Motorola radios are evaluated by ITD and recommended by RCC, Inc., an independent consulting vendor hired by the City to evaluate the Oakland and EBRCSA P25 networks. The new model of APX 6000 portable radios is selected by OPD, due to cost, reliability, usability, high-performance, and interoperability with the Oakland and EBRCSA P25 radio networks. While the project also encompasses portable radios for Oakland Fire and portable and mobile radios for Oakland Public Works departments, the first priority is the deployment of police portable radios. Phase 2 of this project consists of

various radio infrastructure upgrade projects, including microwave network improvements, public siren system upgrade, emergency radio mobile network, etc. As directed by the Council, staff published an RFP for the financing of these projects, and recently selected a vendor. The two phases of the project have a budget of \$16M (approx.) and Phase 1 is estimated to take nine months to complete while drawing from a variety of staff within the City Administrator's Office (CAO), ITD and OPD. Phase 2 is estimated to take 12 to 18 months, requiring close coordination with EBRCSA management and Alameda County staff for smooth and well-coordinated migration.

***Internal Personnel Assessment System, Next Generation (IPAS2):*** This project is part of the effort to ensure compliance with the Negotiated Settlement Agreement (NSA) by replacing the current internal personnel assessment system (IPAS) with a next-generation system (IPAS2) that is more reliable, scalable and sustainable while also substantially reducing the current manual work required of OPD staff when using the current system. This project has a budget of \$4.3M with an estimated schedule of 18 months and a team of at least 42 people (including team members from vendors Microsoft and Sierra-Cedar). The IPAS2 project formally kicks off on March 3, 2015.

***Integrated Public Safety System (IPSS2):*** This project, tentatively scheduled to commence in Fall 2015 is a large-scale project to replace the aging computer-aided dispatch (CAD) and records management systems (RMS) used by OPD and the Oakland Fire Department (OFD). The project also involves replacement of the ancient fire-house alerting system used by OFD and provides for the creation of a new data warehouse to provide a central, normalized database containing crime data from several disparate, currently unconnected sources. A new crime data warehouse will further support the reporting and intelligence-led policing efforts of OPD. The RFP for this system was released on February 17 2015 and, once bids are received, OPD, OFD and ITD will work together to achieve City Council approval for the needed funding. Initial estimates are that this project will cost approximately \$10M-\$12M and take 2-3 years to complete. According to the Police and Fire Chiefs, this project is the highest priority project on the Capital Improvement Program (CIP) funding request list for both Departments.

### **COST SUMMARY/IMPLICATIONS**

This is a status report which outlines the ITD's disposition of past projects during the identified timeframe and the status of current and ongoing programs, projects and services. While there are identified fiscal impacts noted, no funds are requested in this report.

### **PUBLIC OUTREACH/INTEREST**

This item did not require any public outreach.

# **IT is a must have**

---

- Our efforts are focused and directed towards
  - Business sponsorship and collaboration
  - IT Services Delivery for OPD
    - Platforms not point solutions
    - SERVICES, not the Servers
  - Agility and Innovation
- ITD will be aligned with the business
  - IT Maintenance Internal Services Fund (ISF) in place
  - SLAs will be developed
  - Self-serve will be available through the ITD Help Desk
- Shared IT Vision 2015

## ITD Organization

# Use of Resources

- Routine, Scheduled, Emergency
- Upgrades, Hot Fixes and Patches
- Security, Logs and Health Monitoring
- Hardware, Software & Network Maintenance

## Support

- Help Desk Tickets
- Applications, Access, Reporting, etc.
- Desktop and Printer Related
- New Hires, Moves and Relocations

## Projects

- Requirements, Planning, Research, Data Collection
- Project Management, Grants, Staff Reports, Coordination
- Design, Implementation, Integration and Testing
- Support and Maintenance

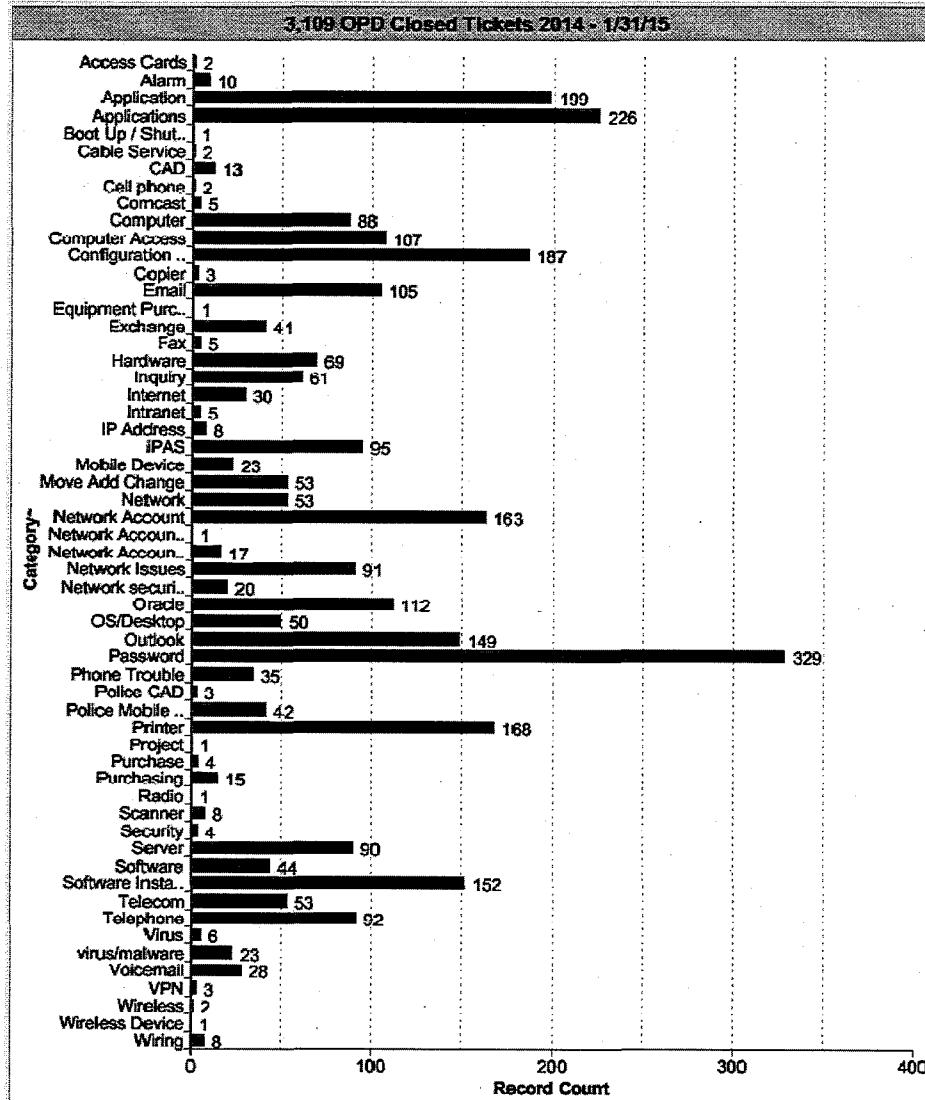

# OPD Help Desk Tickets

|                                                   | OPD | All City | OPD % |
|---------------------------------------------------|-----|----------|-------|
| <b>Approx. Number Full-Time Equivalent Staff</b>  |     |          |       |
| <b>Total Help Desk Tickets</b>                    |     |          |       |
| <b>Closed Help Desk Tickets</b>                   |     |          |       |
| <b>Open Help Desk Tickets</b>                     |     |          |       |
| <b>Avg.# Of Days Closed Tickets Took to Close</b> |     |          |       |

*For the period January 1, 2014 to January 31, 2015*

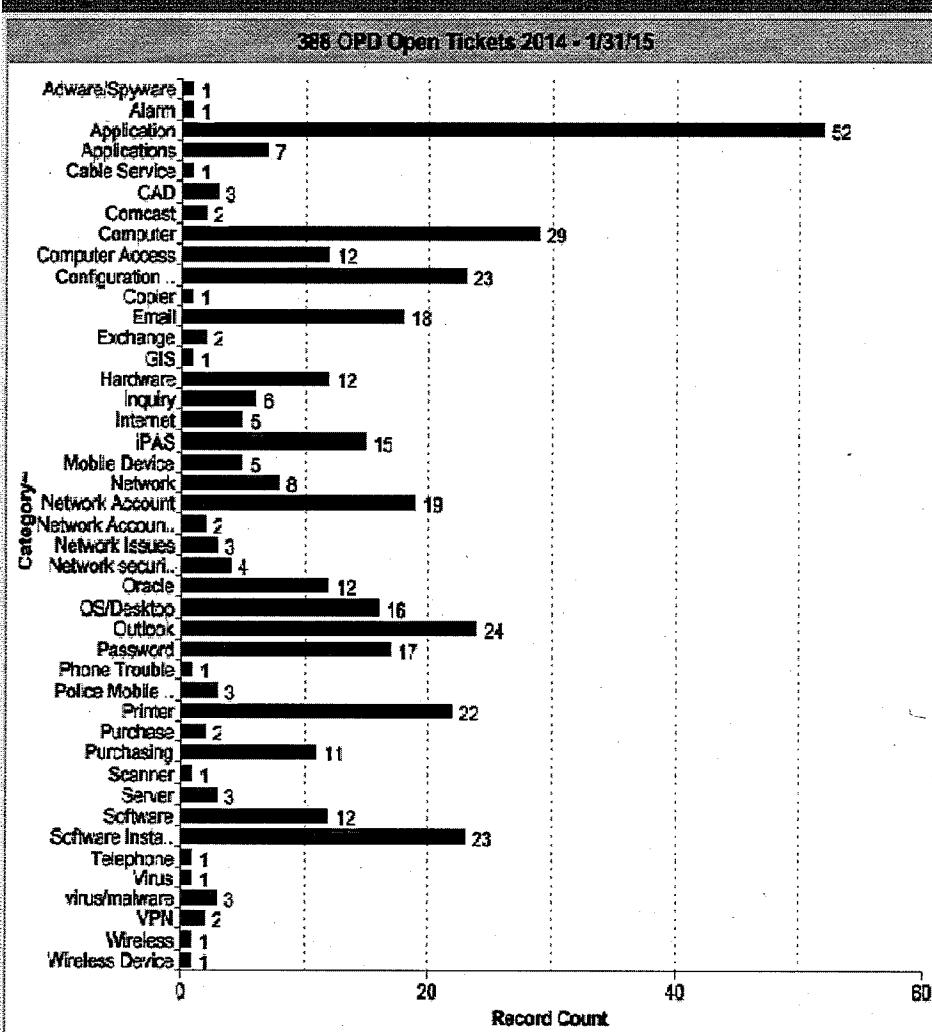

- **Key Points**
  - OPD is a 24/7 operations
  - OPD requires urgent responsiveness
  - OPD staff change positions/assignments frequently
  - There are 100+ business software applications in use in OPD that require some level of ITD support and maintenance

# Closed OPD Help Desk Tickets

- Key Points
  - Most of the tickets are password related
  - Radio Shops tickets are not listed
  - Hundreds of instances of friendly assistance are not recorded
  - Vendors Help Desk tickets are not included

# Open OPD Help Desk Tickets

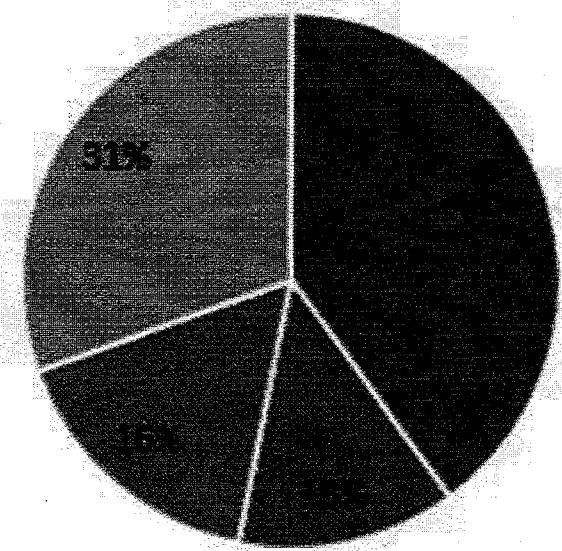

- Key Points
  - Most of the tickets are related to support of applications (including installation)
  - The high number of Outlook tickets should decline as Microsoft Office 365 is deployed in OPD
  - Same exclusions apply as for closed tickets

# Time to Resolve

% Closed Tickets by Days Open

■ 0-1 Day ■ 2-10 Days ■ 11-30 Days ■ 30+ Days

- Key Points

- Almost half of the tickets are resolved within a day
- Almost 70% of the Help Desk tickets are resolved in less than a month
- Equipment ordering and Applications take more time

# Key OPD IT Projects

  - Phase 1 – Motorola Portable Radios deployment
  - Phase 2 – Infrastructure upgrades and EBRCSA migration
- Team – OPD, ITD, CAO, RCC, Motorola
- Budget - \$16.1M
- Timelines

| <b>Phase I - Tasks</b>      | <b>Estimated Completion Date</b> |
|-----------------------------|----------------------------------|
| Staff Report and Resolution | 06/24/2014                       |
| Council Action              | 07/01/2014                       |
| Motorola PO Execution       | 03/05/15                         |
| Radios Delivery             | 04/10/15                         |
| Programming and Acceptance  | 07/31/15                         |
| Radios Deployment           | 10/01/15                         |

# **IPAS2 Phase 2 - Status Update**

---

- Scope – Development of a new Early Warning System
- Team – OPD, ITD, CAO, Microsoft, Sierra Systems
- Budget - \$4.3M
- Timelines

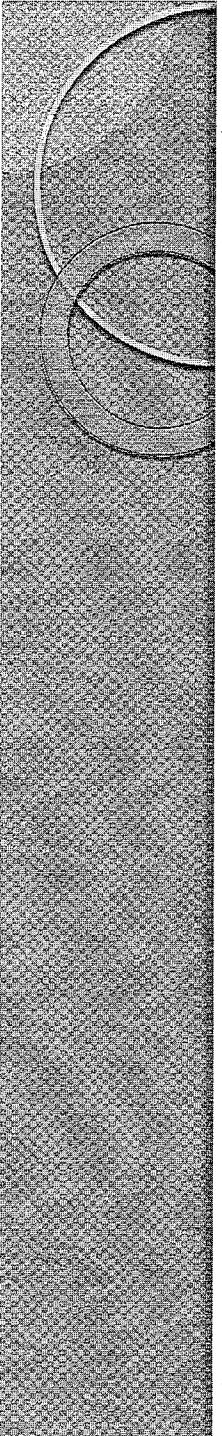

| <b>Tasks</b>                   | <b>Completion Date</b> |
|--------------------------------|------------------------|
| Microsoft Selection            | 04/18/2014             |
| Staff Report and Reso          | 10/2/2014              |
| Council Action                 | 10/21/2014             |
| Microsoft Contract Execution   | 12/05/14               |
| Sierra Contract Execution      | 02/10/15               |
| Kick-Off Meeting               | 03/03/15               |
| IPAS2 Implementation “Go Live” | 07/01/16 (Est.)        |

# **911 CAD/RMS Upgrade**

---

- Scope – Procurement of a new 911 CAD systems
- Team – OPD, OFD, ITD, Sierra Systems
- Budget - \$TBD
- Timelines

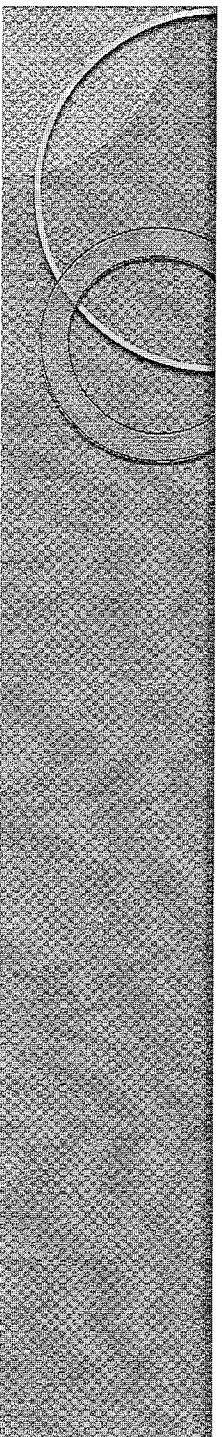

| <b>Tasks</b>             | <b>Estimated Completion Date</b> |
|--------------------------|----------------------------------|
| Publish RFP              | 02/17/2015                       |
| Vendor Proposal Deadline | 04/10/2015                       |
| Secure Funding           | 07/01/2015                       |
| Select Vendor            | 07/01/2015                       |
| Gain Council Approval    | 09/22/2015                       |
| Contract Execution       | 10/16/2015                       |
| Project Kick-off Meeting | TBD                              |

# Accomplishments

---

- Policy Direction and Resolutions
  - Radios – Purchase of New Radios; Infrastructure; and EBRCSA
  - IPAS2 Phase 2 – Vendor selection and contract approval
  - DAC Phase 2 – Privacy Policy
  - P25 Radio Network Maintenance Approval
- Planning/Fiscal
  - 911 CAD/RMS RFP
  - IT Funds – IT Maintenance and Radio ISF (Internal Services Fund)
- Projects
  - OPD 911 Center Infrastructure Upgrade
  - Public Safety Core Network Equipment Replacement
  - Mobile Upgrades - migrated to new Toughbook and 4G
  - OPD Crime Dashboard
  - OPD Internal Affairs application migrated onto a new platform

# **Challenges**

---

- Department has taken significant staffing cuts (over 40%) in the last five years, severely impacting service levels
- Aging Infrastructure and antiquated technologies
- No consistent budget for technology refresh
- Compliance Issues
  - NSA – Negotiated Settlement Agreement
  - DOJ – Department of Justice
- No after-hours IT support for a 24/7 operation

# Questions?

---

| IPAS2 Infrastructure to the Cloud                   | New Infrastructure          | Initiating  | 1% OPD     |        | A discrete element of the IPAS2 project, this potential move of IPAS2 infrastructure to the Microsoft Azure Government Cloud would offer the possibility of a powerful and more scalable and more "future-proof" infrastructure with arguably better cybersecurity protection and better capabilities for surviving a natural or manmade disaster than if ITD were to host the system on local servers. Trade-offs are likely to include the need for a dedicated high-speed connection to the Azure data center. Decision expected in March or April 2015. | 2/5: Initial briefing by Microsoft on how moving IPAS2 to Azure fits into the Justice & Public Safety practice long-term future<br><br>3/2: Microsoft-led Azure deep-dive scheduled                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| Moving VIEVU Data to Azure Cloud | Mobility & Mobile Computing | Initiating  | 1%     | OPD                  | Potentially part of the IPAS2 project, this would move the terabytes of data collected from officer-worn cameras and store it in the Microsoft government cloud rather than in on-prem servers. Benefits would include ease of upgrade to greater storage and processing, more reliable availability in the event of a natural catastrophe, arguably better cybersecurity, etc. |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| Multi-Link Mutual Aid            | Interoperability            | Not Started | 10%    | OPD, OFD, EOC        | Roll-out Multilink mutual aid functionality - video, radio, document sharing, voice sharing. Multilink is the vendor. Local agencies involved outside of OPD, OFD & EOC include City of San Francisco, Transamerica building, and BART.                                                                                                                                         | Kick-off meeting on 12/4/14<br>Working on pre-installation requirementsInstallation tentatively scheduled for 2/17/15(Reviewed and/or updated 1/21/15)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

Detailed Listing of Completed ITD Projects for OPD

for the period from

January 1, 2014 to January 31, 2015

Completed Projects

| Project Title                          | Program                     | Phase     | % Done | Client        | Work/Project Description                                                                                                                                                                                 | Status Update                                                                                                                                                                                                                                                                                                                                                     |
|----------------------------------------|-----------------------------|-----------|--------|---------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Asset Management                       | New Infrastructure          | Completed | 100%   | OPD           | Align all Department Asset Tracking systems and track accountability for all assets                                                                                                                      | In progress Software installation completedCapturing asset information, labeling and tagging<br>DEPLOYED: 12/1/2014<br>Updating assets as they come in<br>(Reviewed and/or updated on 12/5/14)                                                                                                                                                                    |
| CAD Software Upgrade                   | Infrastructure Maintenance  | Completed | 100%   | OPD, OFD      | Upgrade the current CAD software version from 7.0 to 7.1                                                                                                                                                 | Upgrade completed week of October 13<br>County has confirmed interface working properly now.<br>Working on interface issues, but 99.5% of issues now resolved<br>Remediated all known issues with ProQA for Fire dispatch<br>Forecast that remaining long/lat issues will be resolved by Motorola by COB today (11/7)<br><br>(Reviewed and/or updated on 11/7/14) |
| Desktop Computer Refresh Program       | New Infrastructure          | Completed | 100%   | OPD, OFD, EOC | Replace 606 Desktop computer and peripherals.                                                                                                                                                            | 719 computers for OPD all procured and installed - OPD portion of project completed.<br>OFD completed as of 7/24/14First week October - Fire stations installations started 11/3, last one should be completed on 11/12<br>Completed EOC refresh (in October) - all printers and workstations installed<br>COMPLETED<br>(Reviewed and/or updated on 11/7/14)      |
| EOC 911 Infrastructure Upgrade         | New Infrastructure          | Completed | 100%   | OPD, EOC      | Replace existing radio dispatch console furniture with new updated model. Reconfigure dispatch floor for ADA access. Conduct R56 audit.                                                                  | <ul style="list-style-type: none"> <li>• Furniture contract awarded – January 2014</li> <li>• Room demolition completed – 1/15/2014</li> <li>• Furniture delivery 1/20/2014</li> <li>• Furniture Installation – 1/22/2014</li> <li>• DIT Services Re-Installed 1/23/2014</li> <li>• Room Complete 1/28/2014</li> <li>• PROJECT COMPLETED</li> </ul>               |
| GIS – GGM server upgrade               | New Infrastructure          | Completed | 100%   | OPD, OFD      | Migration from workstation to a server                                                                                                                                                                   | Completed in May 2014                                                                                                                                                                                                                                                                                                                                             |
| Intact Software upgrade / OPDSCAN      | Infrastructure Maintenance  | Completed | 100%   | OPD           | Current version is over 7 years old and is posing problems. Need to upgrade to most recent version                                                                                                       | Completed 11/6/2014<br>(Reviewed and/or updated 11/7/14)                                                                                                                                                                                                                                                                                                          |
| One Step Upgrade & Data Sync           | Infrastructure Maintenance  | Completed | 100%   | OPD           | One Step upgrade & offline data synchronization                                                                                                                                                          | Project completed: Sept 2014                                                                                                                                                                                                                                                                                                                                      |
| Online Reporting Kiosk                 | New Infrastructure          | Completed | 100%   | OPD           |                                                                                                                                                                                                          | Completed                                                                                                                                                                                                                                                                                                                                                         |
| UDT upgrade to version 4.5 OPD and OFD | Infrastructure Maintenance  | Completed | 100%   | OPD, OFD      | To resolve and provide significant need features, the Uniform Data Transfer (UDT) server need to be upgraded. UDT is the middleware the sends CAD data to the Police RMS system and the Fire RMS system. | <ul style="list-style-type: none"> <li>• Upgrade is scheduled with Motorola for April 21, 2014</li> </ul>                                                                                                                                                                                                                                                         |
| OPD – CRIMS Interface                  | Mobility & Mobile Computing | Completed | 100%   | OPD           | Crime Data sharing between City Of Oakland and County                                                                                                                                                    | Completed                                                                                                                                                                                                                                                                                                                                                         |
| Verizon 4G Upgrade                     | Mobility & Mobile Computing | Completed | 100%   | OPD           | Upgrade the current 3G Cellular Data infrastructure to Broadband 4G Cellular Data system for high speed connectivity of OPD and OFD mobile units.                                                        | ITD needs to complete the total cost and timeline proposal for OPD to considerNetworking configuration between City and Verizon has been provisioned and tested - working as designedCurrently migrating OPD and OFD mobile fleet assets to Verizon 4G network<br>COMPLETED IN OCTOBER 2014<br><br>(Reviewed and/or updated 11/7/14)                              |
| VisionTek Annual Maintenance Release   | Mobility & Mobile Computing | Completed | 100%   | OPD           | Upgrade all desktop and laptop computers running VisionTek with the latest client release.                                                                                                               | Completed                                                                                                                                                                                                                                                                                                                                                         |

**ITD Public Safety Division Program Areas**

## **ITD Public Safety Division Programs Areas**

### **1. Introduction**

To gain an understanding of the scope of ITD's support of OPD and of Oakland's public safety departments as a whole, it's useful to understand the different program areas, their related projects and how they interrelate with ITD's mission to keep OPD and OFD at the forefront of industry & public safety technology trends. There are seven main program areas as outlined below.

#### ***1.1 Maintenance and Support of Existing Infrastructure Program Area***

This program area is the second largest by total number of projects and, given the size and scope of the existing infrastructure, this should be no surprise. More than a quarter of all currently ongoing projects and over twenty percent of completed projects fall into this program area. In addition, the Help Desk support services provided to OPD also fall into this category.

#### ***1.2 Regulatory/Legal Compliance Program Area***

While this program area is relatively small (only two in-progress projects), it is obviously critical to do everything necessary to maintain OPD's compliance in this area.

#### ***1.3 Mobility & Mobile Computing Program Area***

The area of mobile computing is one in which Oakland's public safety departments (and public safety departments in general, from a general technology market perspective) were early-adopters and leaders. Given the mostly field-based, mobile nature of the workforce, police departments across the country adopted portable radios very early on and they also put laptops in cruisers almost as soon as laptops existed. Mobility in the 21<sup>st</sup> century has continued to evolve and now encompasses a vast array of technologies; from interoperable, programmable radios (e.g., P-25 radios) to broadband wireless connectivity (e.g., LTE and portable Wi-Fi hotspots) to tablets and smart phones. Most recently, the use of mobile, officer-worn cameras extends this category past radios and laptops. There are currently six ongoing projects in this program area in addition to the five that were completed since January 1, 2014.

#### ***1.4 Intelligence-Led Policing Program Area***

Intelligence-led policing is the law-enforcement application of the business intelligence and big data analytics general technology trend. First brought into mainstream use by William Bratton in his CompStat initiative at the New York Police Department, it now encompasses the use of geo-spatial, temporal and link analysis. These technologies help law enforcement analysts and command staff understand underlying patterns of crime activity to help police departments get ahead of crime (e.g., by crunching large amounts of data for the purpose of predictive analytics) and to better manage their limited resources (e.g., CompStat and its variants). There are currently three in-progress projects in this program area.

#### ***1.5 Interoperability and Data Sharing Program Area***

After the tragedy of 9/11 law enforcement agencies from the U.S. Department of Justice to local police departments started a massive mission to build the technological and regulatory capability to share law enforcement information seamlessly between agencies to help improve their capability to prevent future attacks. At the same time, it was recognized that coordinating public safety agency responses to large scale events, such as 9/11, was greatly hampered by the inability of public safety radios to interoperate regardless of agency or jurisdiction. These two interrelated areas spawned a more than decade-long trend in public safety towards better

interagency data sharing and interoperability (radio and otherwise). ITD has two in-progress projects in this program area and has completed one other since the beginning of 2014.

### **1.6 Social Media**

The rise of social media in the general technology market (and in society) has also had an impact in public safety. Both in terms of outbound communications (e.g., Police Department Twitter feeds or the use of services like Nixle to disseminate real-time information) and in terms of citizen engagement (e.g., Nextdoor) social media has pushed the evolution of public safety technology. There is one ongoing project in this program area.

### **1.7 New Infrastructure/Major Improvements to Existing Infrastructure Program Area**

From time to time, some elements of the existing public safety infrastructure need more than just the small improvements provided by regular maintenance and upkeep – they require major upgrades or even replacement. These types of projects are usually larger in scope requiring more resources and time, but they result in great leaps forward in functionality, reliability, cost-savings and/or maintainability. ITD is currently managing six such projects and has completed nine since January 1, 2014, making this the program area with the largest number of total projects – almost 32% of the overall total. The general technology trend of Cloud Computing initiatives generally fall into this category, although not all projects in this category involve the cloud.

## **2. Summary:**

The following is a high-level summary of projects by program and status for the period January 1, 2014 to January 31, 2015. Establishing program areas to align with major public safety technology trends is a useful way to ensure that ITD applies its limited resources to the right areas, but it is also important to note that many projects actually fall into multiple program areas. For example, the P-25 radio initiative addresses the three program areas of Mobility, Interoperability and New Infrastructure. Many other projects similarly span two or more program areas. For the sake of clarity, however, each project below has only been assigned to one program area. For more detail on these projects, see Attachments D & E.

**Table 1: Summary of ITD Projects for OPD, Jan. 1, 2014 to Jan. 31, 2015**

| Program                                                                                             | Projects In Progress | Projects Completed |
|-----------------------------------------------------------------------------------------------------|----------------------|--------------------|
| Mobility and Mobile Computing                                                                       | 6                    | 5                  |
| Intelligence-Led Policing/Predictive Analytics                                                      | 3                    | 0                  |
| Interoperability and Data Sharing                                                                   | 2                    | 1                  |
| Social Media                                                                                        | 1                    | 0                  |
| Existing Infrastructure Maintenance                                                                 | 8                    | 4                  |
| Regulatory/Legal Compliance                                                                         | 2                    | 0                  |
| New Infrastructure and/or Major Improvements to Existing Infrastructure (e.g., moving to the cloud) | 6                    | 9                  |
| <b>Sub-Totals</b>                                                                                   | <b>28</b>            | <b>19</b>          |
| <b>Grand Total</b>                                                                                  |                      | <b>47</b>          |

OPD/Public Safety IT Infrastructure Elements

## OPD/Public Safety IT Infrastructure Elements

### OPD/Public Safety Facilities Supported

- Police Administration Building
- Eastmont Substation
- Internal Affairs Division (IAD) Office
- OPD Dispatch Center - Primary
- OFD Fire Dispatch Center (FDC) – *Backup for OPD Dispatch*
- Emergency Operations Center (EOC)
- 150 Frank Ogawa Plaza
- 250 Frank Ogawa Plaza
- Family Justice Center
- Animal Shelter
- 340 Police Cruisers & Other Vehicles w/laptops & mobile “air cards” for Internet access
- Domain Awareness Center (DAC)

### Public Safety Network

- ~40 routers/switches
- Miles of fiber optic cable

### OPD Computer Hardware

- 122 OPD servers
- ~900 OPD desktop computers
- ~260 regular OPD laptops/mobile computers
- ~340 OPD Cruiser-mounted laptops (MDTs)
- ~300 OPD printers
- 1,000 Smart Phones
- 40 EOC desktop computers & thin clients
- 3 computers + 2 printers at EOC PIO
- 3 printers, 1 plotter at EOC Operations
- 3 computers at EOC for OPD Dispatch
- 15 computers + 10 printers for EOC Admin Staff
- 33 computers + 10 printers at OPD Dispatch

### Public Safety/OPD Radios

- P25 Simulcast Radio Network
- EDACS Analog Radio Network
- 10 Remote Network Sites
- 4 Public Safety Dispatch Centers
- 1100 Portable radios
- 600 Mobile radios
- 35 Dispatch Consoles
- 4 Public Safety Dispatch Centers
- 2 Local Government Dispatch Centers
- 1100+ Interoperability Managed Radios
- 6 Multi-Agency Aircraft Radios
- 27 Remote Emergency Siren Sites
- 60 Mobile Network Routers

### OPD Telecommunications

- ~1,200 Telephone handsets

- 9-1-1 Customer Premises Equipment (CPE)
- 1 Central PBX
- 6 Microwave towers

#### **General ITD Resources OPD Utilizes**

- ITD Help Desk
  - 4 Full-time technical staff + Supervisor
  - 1 support database (RemedyForce)
  - Remote access software
- Office Productivity Software
  - Microsoft Office (current)
  - Office 365 (being implemented)
- City IT Network (connected to the OPD network)
- City Enterprise Back-up Systems
- City Web Site & Intranet
- Oracle Enterprise Applications (e.g., payroll)

#### **OPD-Specific Software/Systems**

1. Computer-Aided Dispatch (CAD)
2. OPD Records Management System
3. Kronos TeleStaff scheduling software
4. VisionTek Field-Based Reporting
5. Internal Personnel Assessment System (IPAS)
6. Hummingbird Query & Analysis Tool
7. Personnel database (PDB)
8. Canine Deployment database
9. Use of Force Tracking database
10. OC Checkout database
11. Vehicle Pursuit database
12. Vehicle Collision database
13. 3Si Tracking
14. Lexis/Nexis investigation tool
15. Acme Security Proximity Card Admin.
16. Adobe C24 for Latent Print Computers
17. Afaria Mobile Laptop Administration
18. Motorola RDLAP Wireless Data Network Controller
19. [www.infox.com](http://www.infox.com)
20. Asset Works Gas Card Reader Program
21. AT&T Software (replacing Symposium)
22. Box.net Online Document Collaboration
23. Imagis Computerized Arrest and Booking System for Personnel
24. Department of Justice (DOJ)/Department of Motor Vehicles (DMV) ID Information System
25. SWAT Team Call-out Paging Application
26. AT&T DataCom for 9-1-1 Messaging and Directions
27. Cassidian 9-1-1 Phone System with Automatic Number Identification (ANI)

and Automatic Location Identification (ALI)

28. Crossroads Solutions Electronic Citations and Citation Printing
29. ALCO Criminal Data Entry and Regional Criminal Records Information
30. <http://gisapps/cvws/>, Browser-Based Crime Statistics Mapping
31. Trakker Special Victim Notifications
32. DOJ (Corpus successor)
33. DOJ Sex Offender and Arsonist Registry
34. Interfaces to City Attorney Case Tracking System
35. Foray Crime Scene Evidence Technician Digital Photo Application
36. E-Quill Online Transcription Software
37. Bosch Interview Room Recording System
38. Integrian In-Car Video System
39. Interfaces to Uniform Crime Reporting (UCR) Data Information and Statistical Queries
40. DOJ Towing Information Application
41. ECaTS Emergency Call System
42. Imagis Composite Drawing Application
43. eSOPH Background Checking
44. Xerox Application to Track Evidence of Parking Enforcement for Red Zones
45. Spectrum Management Company Tracking System for Bank Robberies
46. Motorola Personnel Performix Matrix App.
47. Exalt Microwave Connectivity
48. Attachmate Terminal Emulation
49. Foray Technology Adams Application for Latent Prints
50. NICE 9-1-1, Records and IAD Phone Recordings

|                                                                         |                                                            |
|-------------------------------------------------------------------------|------------------------------------------------------------|
| 51. Fuji Film Development Equipment                                     | 94. Animal Shelter Volunteer Tracking database             |
| 52. Glav Radiation Detector                                             | 95. 1 <sup>st</sup> American Title Property Assessors Data |
| 53. Geo-Spatial Technologies Automatic Vehicle Location (AVL) System    | 96. Coplogic                                               |
| 54. InfoDynamics Indexing of Scanned Records                            | 97. SpeedTrack                                             |
| 55. Diester Electric Vehicle Key Management                             | 98. ShotSpotter                                            |
| 56. DOJ Parole Database                                                 | 99. Omega Group Crimeview                                  |
| 57. Copware Legal Reference                                             | 100. Forensic Logic                                        |
| 58. Latent Prints Database                                              | 101. OpenQuery                                             |
| 59. MapScenes Officer-Involved Shooting Tracking                        | 102. LIMS                                                  |
| 60. DOJ Sex Offender Registry                                           | 103. License Plate Recognition (LPR)                       |
| 61. Nero Latent Prints Machine                                          | 104. GST Mapper                                            |
| 62. RSL Traffic Radar Monitoring                                        | 105. VIEVU Officer-Worn Camera System                      |
| 63. Wireless Group Encryption Application for Aruba Access Points       | 106. SAP Crystal Reports                                   |
| 64. OPS Intranet Site                                                   | 107. OPD Internal Affairs Division (IAD) database          |
| 65. Motorola Financial Management and Point-of-Sale Application         | 108. Vidsys                                                |
| 66. Motorola CLATS Data Application                                     |                                                            |
| 67. Stellent Image Processing Application                               |                                                            |
| 68. PIPS Technology ANPR Graphical Interface System                     |                                                            |

# **Attachment H**

**Help Desk Tickets By Category Analysis**

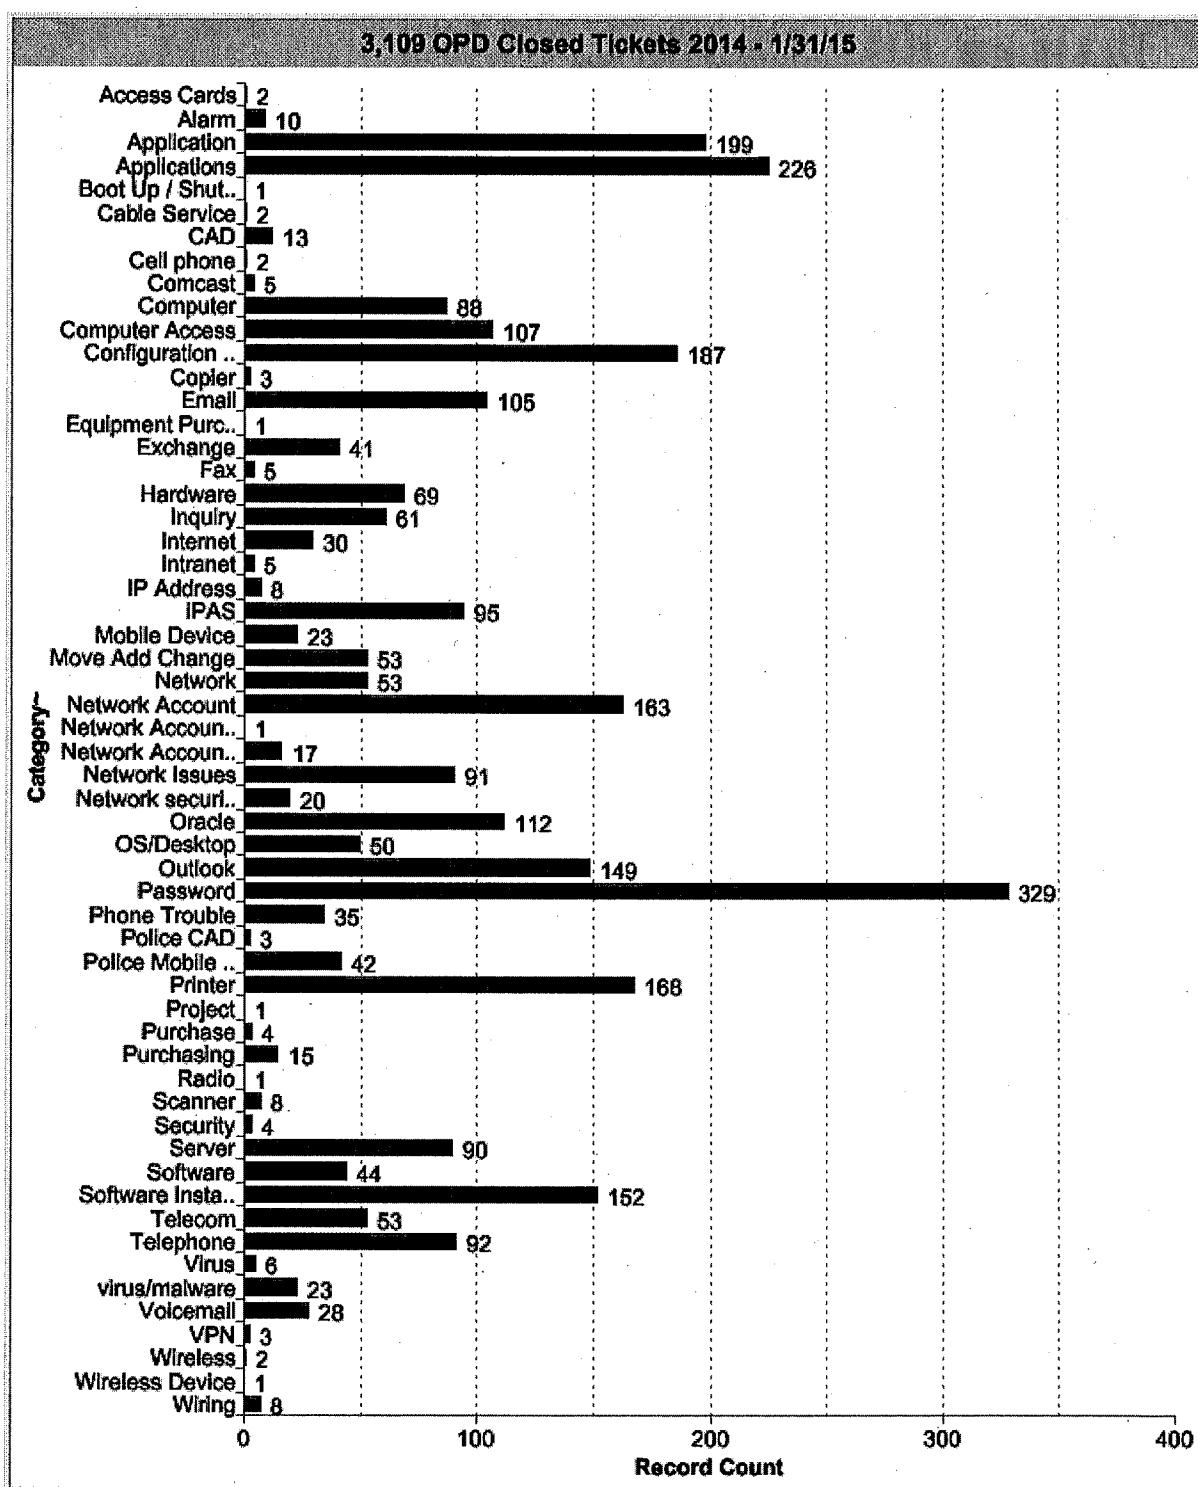

**January 1, 2014 to January 31, 2015**

## **Attachment H: Tickets by Category Analysis**

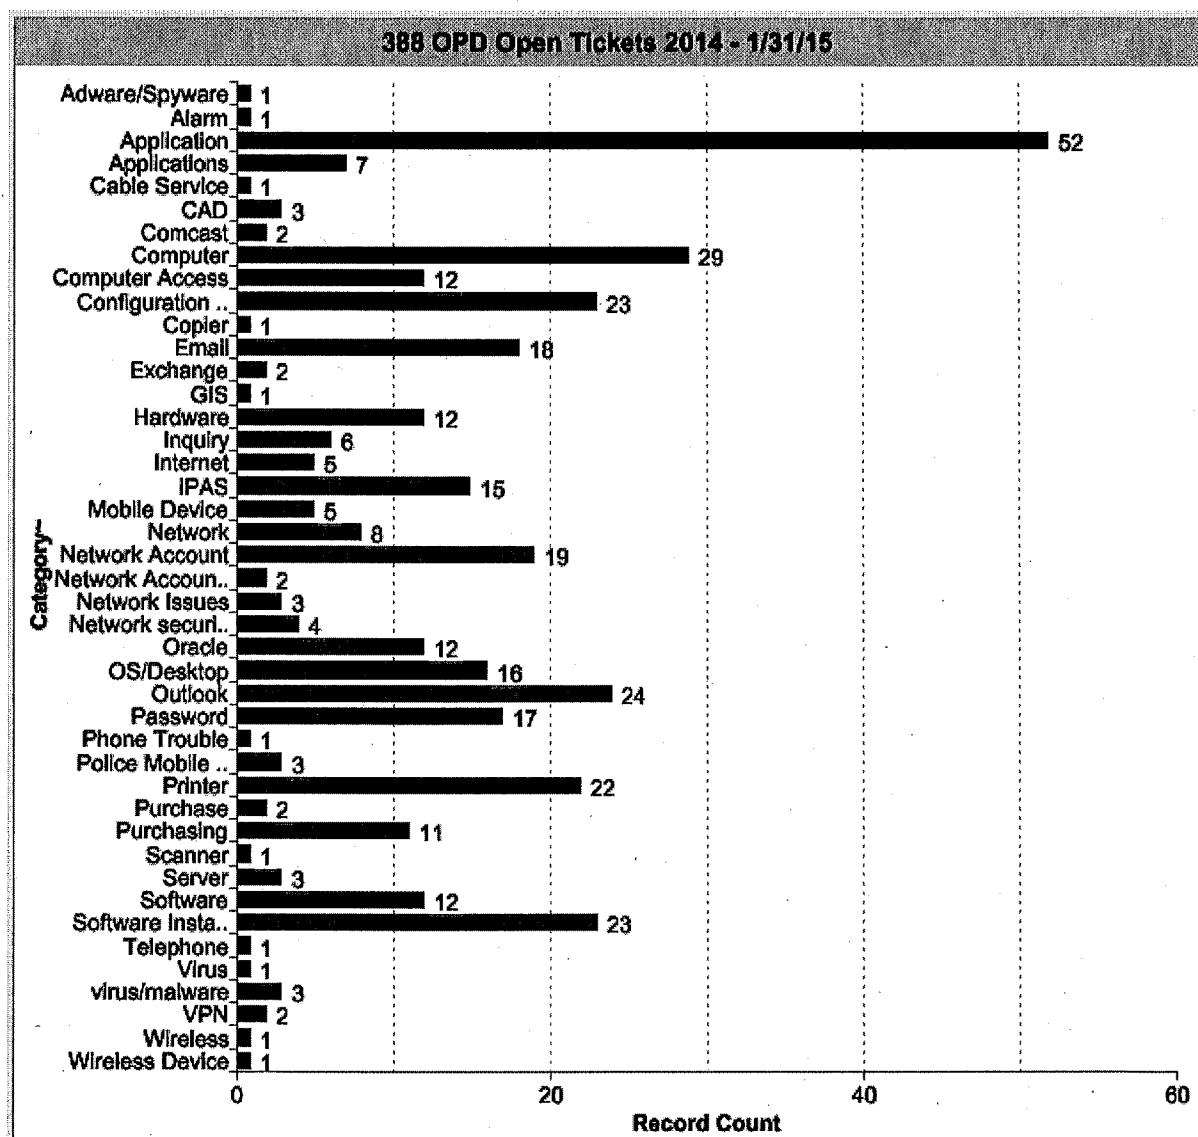

The figures below provide different ways of analyzing Help Desk tickets by category. In Figures 1 & 2 the focus is just on the *count* of tickets by category. This shows, for example, that requests to reset passwords is the number one issue for the tickets closed since January 1, 2014. As long as a technician is available who has security clearance to access the OPD network, resetting passwords is a relatively uncomplicated issue, which is one of the reasons this category is not the top item on the list of *open* tickets. In Figure 2 it is clear that the category of Applications accounts for the largest number of open tickets. Given that installing, configuring and troubleshooting applications can be a very time intensive and difficult task – particularly as it often requires involving the application vendor, hence the reason this category accounts for such a large number of tickets.

Similarly in Figures 3 & 4, tickets that involve dependencies on external vendors (e.g., purchasing, installing and configuring equipment or dealing with Comcast on cable issues) are at the top of both the closed and open ticket list. Outlook issues are also well represented in the chart on open tickets – a long standing category this is being addressed as the City deploys Office 365 which includes a much more modern and reliable version of Outlook.

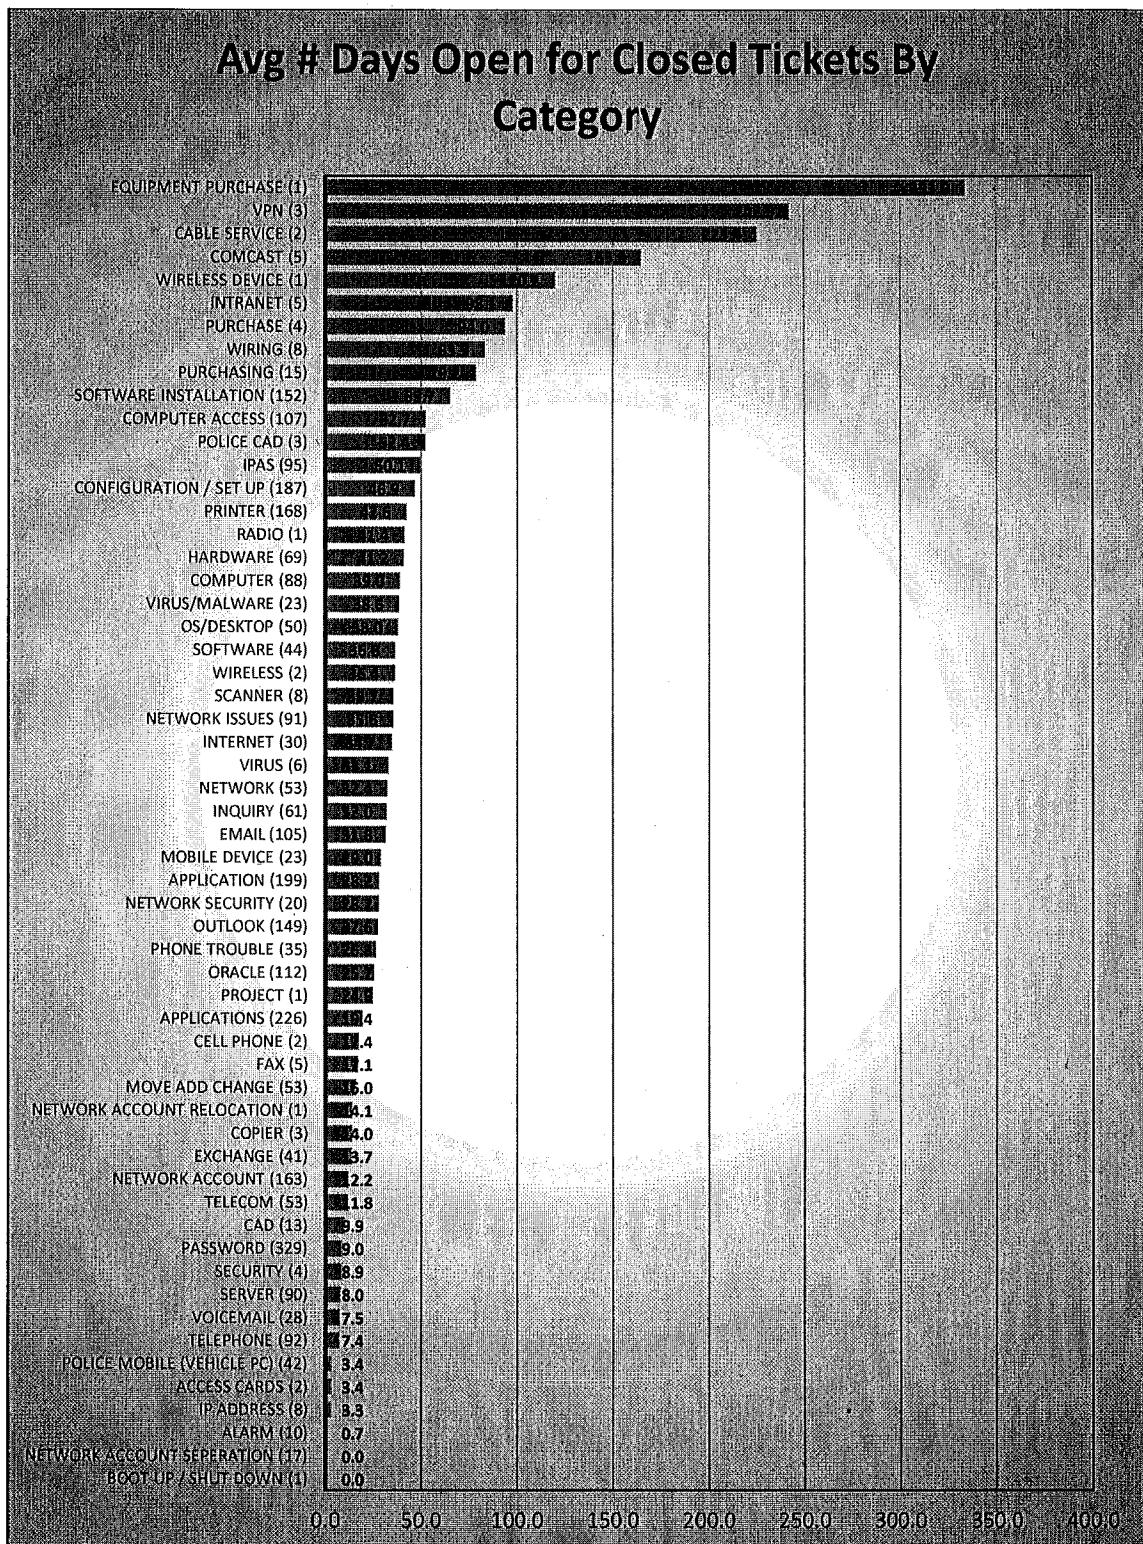

**Figure 1: Closed OPD Help Desk Tickets by Category**

**Figure 2: Open OPD Help Desk Tickets by Category**

**Figure 3: OPD Closed Tickets by Category Sorted by Average Days Open (number in parentheses is number of tickets for that category)**

**Figure 4: OPD Open Tickets by Category Sorted by Average Days Open (number in parentheses is number of tickets for that category)**
