NEW DIRECTIVE: During the recess, goal is to expedite distribution of funds, including by issuing those specified per the divided funds above. Admin to bring process to distribute the rest at 7/28 Council meeting, and to bring report back to Council about the allocations completed, and action to allocate any remaining, at the First Council meeting in September 2020.

POLICIES

Already Adopted:

- NOTE A Reduce additional \$8million of OPD overtime expenditures to be held until after review and policy-making process, and civilianization analysis, to provide tracking and accountability for unbudgetted expenditures, and to provide civilian response for certain calls. See recommended study to provide options for civilians for special events permits. street closures, bicycle and pedestrian work etc
- NOTE B Grant funds/donated funds appear to not be being fully properly tracked and accounted for in the budget. Such funds should be directed to the appropriate department overseeing the relevant project, through a transparent process, and included in the budget.
- NOTE C The Administration's budget proposal includes the statement that any additional funds received can be budgetted by the Administration without retur to Council, using broad lists of categories which give lowest priority to items vital to essential functions such as blight removal and Information Technology. Therefore, remove that section, and any use of new funds shall return to Council.

ADD THE FOLLOWING POLICIES

- Note D Develop a plan for a 50% reduction in the OPD budget for the next budget cycle. Key elements of this plan are described, and should be further developed by City and Community stakeholders. Include review of various functions that can be alterred, and input from community Affirm that Councilmembers Bas and Taylor will be the Council point persons for this effort, and that it must include the voices and input of impacted communities.
- Note E Homelessness allocation Ensure community engagement and input in the Council's future allocation of additional homelessness funds in order to assure their best and most impactful use, and that resources are directed in a clear and coherent manner that ensures timely response. Expand access to sanitation and public health needs.
- Note F Civilianizing Traffic Enforcement to pursue options for civilianizing traffic enforcement, including by directing our administration and our Legislative Advocate to work with State leaders on any support or legislation needed to help enable this goal, and partnering with other cities who are working on similar efforts.
- Note G Diverting funding from incarceration to community needs Advocacy to the County. While cities have been deliberating and working on revising police functions and restoring funding to community needs, the County in which we are a part, Alameda County, has voted to increase the budget for the County Sherrif by over \$300 Million. This increase is funding incarceration and heavy-handed enforcement, including the use of tear gas against demonstrators. As we continue the work to make improvements in Oakland, the conduct of the County in which we are located continues to shift resources in the opposite direction. Thus, we propose for it to be our policy, and to ask allies and advocates to help, to seek changes at the Alameda County level, both in terms of pressure to use heavy-handed policing tactics, and in terms of shifting funding from incarceration and law enforcement, toward vital community needs, including public health and homelessness, and to communicate these goals to County leaders.
